User-agent: *

Disallow: /control/

File robots.txt

Try to brute or find the the files in control directory.

How can i do that ? am new sorry

Ramb0x - April 14, 2019, 5:26 am

Search google for dir busters, directory fuzzers

SIM-4200329 - April 14, 2019, 9:12 am

I actually found more directorys but they need the correct credentials to access them

mbmerc.com/files/

mbmerc.com/ftp/

Also are you good in accessing this kind of links ?

GnosticPlayers - April 15, 2019, 9:42 am

There is a much easier way of getting around this lol

Edit:

The admin email is using Gmail (feedback.mercenaries@gmail.com)

& the backup email for the feedback gmail is

"3d.....@gmail.com"

I did just get into that email, but I got logged out.

Password was: iasuahd8a7s8dh

Try social engineering methods to find information on the staff members. I know for a fact that some

of the staff are doxable & I've already done so on one of them. If you're not too sure what social engineering is, go to the "Beginner Hacking" & "Private Investigation Methods and Anonymity" sub-forums.
