Thread: [User infecting users with HVNC](#)

Zorb - April 13, 2019, 9:15 am

<https://hackforums.net/member.php?action=profile&uid=2273963>

Came onto my join.me and ran a hvnc powershell in my cmd and immediately blocked me after lol

thanks @ <https://hackforums.net/member.php?action=profile&uid=2650469> for removing it

He's PMing members to add him on telegram and asking to connect to teamviewer/screenshare and is gonna try to infect

int - April 13, 2019, 9:20 am

yeah his trust scan showing matching members, i wouldn't trust him

Do you have some extra proof you can send us so we can confirm he's the one doing that?

Thanks for letting us know..

The user is shady, he was pretty much inactive for 2-3 years.

So could be a legit

Every detail on his account was changed on 04-08-2019.

NERO - April 13, 2019, 9:42 am

It's all good, Just be careful who you allow on your computer, As for this dude, Inactive then suddenly all his info is changed, Most likely a hijacked account.

Everex - April 13, 2019, 9:47 am

Wow i got message from someone 3-4 days ago to add his Telegram, maybe it was him...

I don't even trust FREE PDF-s here, i heard they can infect you with PDF and MsWord Exploits too.

:/ And they don't ban this scammers/hackers?

WatermelonHaze - April 13, 2019, 9:48 am

He's a multi ; Wouldn't expect anything less lol, Be careful who you trust OP.

HF bans scammers and hackers. But they cant protect everyone who's stupid enough to download anything. Everything here is at your own risk.

You're right except for HF doesn't ban scammers except in rare occasions. HF staff don't get involved with deals unless it directly involves breaking policy.

I mean it does ban scammers, Literally look at the deal disputes, They protect vendors also which is right, However it's something they shouldn't have to do.

Portugal - April 13, 2019, 11:00 am

Why would you let someone gain access to your computer?

NERO - April 13, 2019, 11:03 am

Okay i understand, but don't worry i never download "FREE" stuff. If i download i use it on VPS/RDP, Virtual Machine or Sandboxie. Never run any software directly from my PC.

I don't even understand this guys, who let random ppl to use your main PC via TeamViewer or Putty lol.

Would've been great for the lol though xD

duck - April 13, 2019, 12:01 pm

bullshit, kid tried the same on me.

jobhip - April 13, 2019, 12:38 pm

To anyone who this excuse for a human being tried this on with success, change your logins. He almost for sure has them.

SIM-3257834 - April 13, 2019, 1:46 pm

Well would you look at that! His favorite section is the rat section, skids be skiding. It's okay he's probably using it for network administration like every rat user.
