Thread: [Infect a pc with a rat thats not fud?](#)

**Joklol** - April 13, 2019, 1:28 pm

Is that possible?

Like buy a rubberducky or something similar and shut of the antivirus and then the rat gets installed?

If i could get a fud rat/crypter i would buy but everything in here seams to be shit .

**Faith Connors** - April 13, 2019, 2:40 pm

you could always skip the buying process and do it for free if you learn enough about programming.

**realsunjester** - April 13, 2019, 2:42 pm

if you have a rubberducky on the machine, why would you need a rat?

**Joklol** - April 13, 2019, 3:56 pm

The rubber ducky has to be in it all the time.

And a rubber ducky cant show you pics on the pc or listen on mic etc.

**Desy** - April 14, 2019, 11:29 am

You could make your file an exception on the AV and firewall. But you might as well just invest in a crypter as it's not that expensive.

**Ramb0x** - April 14, 2019, 12:15 pm

Crypt a rat with crypter.

**PerfectStorm** - April 14, 2019, 12:17 pm

Its possible but most likely any anti-malware/ antivirus will stop it dead.

**Joklol** - April 14, 2019, 12:46 pm

Problem with a crypter is that there is no private stub in here.

Do you need an infection for a long time? And you don't mind if the machine has to reboot (all automatic)? If so PM me, I have something that may interest you.
