Thread: [#Natasha UID= 2273963 - Infected User infecting others.](#)

NERO - April 13, 2019, 5:16 pm

So this idiot who's obviously stolen the account has been trying to get people on telegram then telling them to go onto teamviewer or anydesk then running a real shitty powershell script that installs DarkHvnc.

Guys the literal meaning of a skid.

He also tried to grab my ip as shown in the pic above (Edited so no one gets curious) The link goes to Grabify.

Be careful, Do not add this user, Do not trade with this user, Don't accept anything from this user.

Probably gonna get closed soon because of infecting. If it gets closed and if he really stole the acc, will the original owner still recover it?
