Thread: [H-Solutions.net SPOOFED / BULLETPROOF SERVERS \[VPS / DEDICATED \]](#)

Hsolutions - April 14, 2019, 1:04 am

Need affordable and reliable spoofed or bulletproof servers?
Use HSolutions.

Website: h-solutions.net

If you have any questions here is our FAQ.

How do I receive my server?

After you buy the desired service on the website you will receive an email with the details of the server and also details to a control panel where you can manage your server, see bandwidth usage, etc.

What payment methods do you accept?

We accept bitcoin / eth and paypal! Yes paypal, however paypal payments are often disabled due to our accounts getting locked, if it is disabled contact support to pay via paypal.

Do you ban?

In bulletproof vps and dedicated servers you are allowed to give any use except for CP hosting, in spoofed vps you are allowed to launch as many attacks as you want but we don't allow scanning or filtering on them. Dedicated servers will never be banned.

Delivery time and stock:

Servers will always be delivered instantly after your payment gets the first confirmation in the bitcoin/ethereum network, if we don't have stock on the dedicated servers you won't be able to buy, meaning that as long as you are able to pay it means it is ready to be delivered!

If you have any questions feel free to contact support of h-solutions.net

Hi,

Can you post proof about the bulletproof ?

Can you post proof about the bulletproof ?

Hey, I'd like to, any ideas on how to prove that?

I can show the abuse reports on one of the servers or?..
