Thread: [PUBG Hack - 1.50 Day key's](#)

The-Noob - April 14, 2019, 6:20 am

The hack has everything that you would expect from the standard hacks such as ESP, Weapon ESP, Aimbot and so on.

Like mentioned i am willing to give a few vouch copies out to the first few replies so, if you want one just request one.

Some users may need to disable secure boot and fast boot in order to get this to work.

Any questions then feel free to ask.

i wouldn't mind taking a vouch copy also the pic of your thread designs isn't showing up

Steam - April 14, 2019, 6:25 am

Are you reselling this or is it private developed?

Hmm not too sure whats going on there? Working for me, anyone else not getting it?

Will send you the details.

Nice, which language did you develop this in?

Could you give us some more information about bot besides that it has ESP, Weapon ESP, Aimbot?

Any video of setting up the bot + playing with it, uncut?

Edit: i also don't see the thread design

It's C++ and i am not the coder. I don't have any videos of the hack or setting it up but i can see if anyone has any ?

As for features it has everything you would need to be honest.
