Thread: [How to create Auto Responding Bot for WhatsApp \(Auto Reply\)](#)

AhXaN - April 14, 2019, 9:32 am

Hello Guys may of us known there we can make auto replying WhatsApp messages. Also many donno how to make one by there own. Today in this post am going to cover almost everything about our own auto reply bot service. (mainly high priority given to the auto responder app in this post)

Does it requires coding skills ? - probably not. Now multiple apps available to make whatsapp auto replying. So, No need any special knowledge of coding. But, Some apps works through PC requires some python skills (fortunately we don't gonna make post with that. We see more easy way without codings)

Important Note !

Auto Reply or Using Bots are against WhatsApp Terms and Policies. So, You may be banned for using those. Personally, I have tested these apps and methods listed below and not get banned yet. That doesn't mean happen same for you. This is an alert before using our tutorials. Be safe ? Try using it in your alternative numbers.

Lets Get into the topic. Written tutorial + as well as Video Tutorials.

Auto Responder for WhatsApp

It is an Application available in playstore which works by taking permission of Notification access. For simple understanding, If you receive messages you will receive notification, It will auto read notifications and respond to those by replies which we set through this app. This application available for free and as well as paid. (no worries i will share paid app for free here) ?

For Example : If we set,

If received "Hi"
Reply with "Hello"
Then it happens..

Step by Step Tutorial

(If you feel hard with written Tutorials go with visual video tutorials, links available below)

- step 1 : Install the application (link below)
- step 2 : Open the application
- step 3 : Allow notification permission

step 4 : Click Plus + symbol on bottom
step 5 : Type What bot need to respond for,
step 6 : In "Should be Answered" text box
step 7 : Then type What bot need to reply
step 8 : In "Should be sent" text box
step 9 : You can set only for Group/Contact
step 10 : More Features & demo given below,

Features

- Instant Auto Reply
- Works on Same number
- You can also set delay timers
- Send only for groups/contact/both.
- Send Multiple Replies
- Send Random counts
- You can store received msgs in db
- Send to specific contacts/groups
- Send Except to contacts/groups
- Send only in particular time/day
- Pause Auto sent for particular time/count
- ? To avoid Spamming
- Also it had some inbuilt commands
- And more,more and more..

PM ME To Get ThE Download Link Of Auto Responder Premium.Apk

Enjoy :)

REP = Appreciated
