Thread: [Free SMS FLOOD! Send your friends 10,000+ SMS/minute!](#)

LittleBoy - April 14, 2019, 10:19 am

I may be offering this as a paid service in future but for now it is free. You need only get in contact with me and tell me your target's phone number, the custom message you would like sent, and how many times to send it...

Right now it is working for US, Canadian and Mexican phone numbers. Word of warning regarding Canadian numbers, some carriers charge per SMS when received from a US number so if you flood a Canadian number with this service don't say you weren't warned.

I have tested this with a brand new Samsung Galaxy Note 8 at full power and during the flood the phone was completely disabled, you couldn't unlock the screen or use the device in any way. The battery had a full charge but was drained to 20% after just 30 minutes of flood, it also got very warm to the touch (maybe just a Samsung feature). It never was able to register how many SMS were received as I had to do a factory reset to get it to respond normally again.

This method is completely homegrown and developed by me, it doesn't use Twilio or any VOIP shit, and it doesn't use the SMS-Email Gateway trick either, the texts will arrive from thousands of REAL random numbers so blocking them is impossible.

Currently online and accepting targets. Best way to reach me is to PM me your preferred method of chat and your username on that platform, I have pretty much all of them but prefer XMPP.

sms-spam@xmpp.jp

I will periodically bump this thread when I am online and accepting targets.

Happy Flooding guys.
