Thread: [Chipotle Gift Cards \[50% Face Value\]](#)

I have plenty of Chipotle Gift Cards. These cards were simply generated from a promotion, there is nothing illegal or blackhat about these. The specified promotion had given a random amount to the gift card, and therefore I have the following options available.

Accepting 50% of the value via Apple Pay, Cryptocurrencies, or PayPal. Please ensure to open a contract. :)

Current Stock:

GC Balance = 1.25

GC Balance = 1.63
