Thread: [Longterm Shopify Product ---> TURN \\$70 INTO \\$350 IN 1 SALE <--- Can be dropshipped.](#)

Steam - April 15, 2019, 6:44 pm

TURN \$70 INTO \$350 IN ONE SALE!

I have an established eBay/Shopify (Sales) product for sale.

This product does sell and in general there is a large demand for this, this product is already being sold globally however not with these profit margins, whoever gets into this is usually stuck with a x2 profit at max however using my online supplier you are able to dropship or resell this and earn atleast x5 of it's initial cost.

The price of the product is around \$70 and you are not tied down to 1 single seller, you can sell this product for years and the average sales price is around \$300-\$425.

Because you can dropship this properly without any issues you don't need any investments to get started with this, you can sell right away.

- [+] Can be dropshipped
- [+] 100% Whitehat
- [+] Large profit per sale
- [+] Long term product
- [+] Can be sold anywhere
- [+] Limit competition - Drop price to x3 (\$210+)
- [+] Quick cash, deliver fast.

Price of sales item:

\$320-\$375 = normal price

\$210-\$290 = cheap price

\$140-\$190 = extremely cheap

Item Buy price: \$70

(Apr 16, 2019 07:56 AM)evelution Wrote: [\[CITE\]](#) Hey folks, purchased the first copy.

it's exactly as advertised.. a hot, in demand product that has a very high profit margin. Looks like it's selling pretty well, so will follow up with results in a few days.

one thing to note is that delivery times may not be super fast.. could be up to a few weeks, but don't see that as much of an issue.

looking forward to trying this out. Thanks OP!

I was lucky enough to get a vouch copy for a discount - I did pay \$50 out of pocket for this product as well.

Beginning:

The seller was really nice and helped answer all my questions, was also super responsive. I got the product quickly after I paid and the seller gave me a full explanation.

The Product:

To start off, there isn't just one product. The seller provides a whole list of products. They are all related and similar to each other, however each provides a different opportunity for profit. There is no problem with sourcing, there are tones available so that won't be an issue. These products can't be easily saturated as there are many choices from which you can choose from. The product itself costs anywhere from \$30-\$80. I've never seen these items cheaper, a very demanded product as well that will always be in demand.

I was really surprised when I saw the products and how cheap I was able to get it for. I would say you can easily sell most of these for \$250+, some even higher. Even if you decide to sell at \$300, it is still much less then most other competitors out there. There is profit to be made on all of them and it is very easy to get started. A very high margin here.

Product can be easily dropshipped, only downside is the amount of time shipping takes(but that's with most dropshipped products). You are able to ship anywhere in the world.

I am currently testing the product and waiting for some sales so I can post my earnings. I will update in a few days

Final Thoughts:

I think the product here is great, the seller is very helpful and responsive, and overall there is a lot of money to be made. I will write my final review in a few days but from looking at the product itself, I can already tell my final review will be positive.

I'll be selling this limited to avoid competition and i'll price it firmly to avoid leakers.

Got a vc for people?

There's a lot of shopify threads recently, all mostly don't work. I own a shopify store which is doing quite well and I can tell if your product is what you advertise to be.

Some payment proof would also be nice.

I don't see why you would sell this, it would just saturate your method.

Also, can you post some payment proof?

I've described it exactly as it is, it can x5 (normal price) your cash in a single sale, it can be dropshipped, there is competition but you can limit that by dropping the price to \$210-\$250 which is still triple (x3) (low price) of the initial cost.

If you want very fast sales you could sell it for \$140-\$175 (extremely low) and still earn yourself a very nice profit.

This is not a new product, this is an established product which usually costs alot more to buyin however i have found a source with multiple sellers with similair prices to this exact product described.

There is 1 vouch copy but i'll decide who gets it when a couple of more people asked for one.

Price of sales item:

\$320-\$375 = normal price

\$210-\$290 = low price (cheap)

\$140-\$190 = extremely low (very cheap)

Item Buy price: \$70

The vouch copy is sold to #Cake.

He made an offer of \$50 which i ofcourse accepted this way the product remains completely

premium and private, #Cake is reputable enough aswell.

eBay, Shopify, you can dropship.

You can even find customers around you in real life, it's a product that anybody wants basicly, especially for the price you can sell it for.

Easily targeted via facebook aswell, i have no experience in instagram whatsoever tho i dont even have an insta account lol

Yes you can create photo content around it and it's also easy to make an instagram page around this aswell especially because there are multiple "variants" of the product described aswell and new variants get released overtime tho.

That is only if you dropship, you can also buy stock for \$70 and sell for \$350.

Next to that your competition is selling for AT LEAST \$350 so when you sell for \$250 for example people don't mind waiting a little bit longer.

You can even sell it for \$140 which is extremely cheap and still have a very good x2 profit margin.

Alot of people are already selling this, it's an established product in high demand but they are all selling for At least \$350-\$500

Due to the cheap price through my source you can easily compete with anyone already selling.

And i'm only selling 5 copies, after that i'll close sales down for good.

So no there is no saturation risk, at all.

Also, customers will only be upset if you lie to them. If you tell them they'll receive it in 3 days and it takes 3 weeks, of course they'll be upset. Just set the expectation upfront and you'll be fine.

True, couldn't have said it better myself.

Jombah - April 16, 2019, 6:31 pm

I'm fairly concerned that you're switching your username after every product you list - why is that? Are you trying to hide your identity after every sale?

Also - why would you sell something that can get saturated? I understand people who sell business plans, and other techniques to earn income online, but having people compete directly against you makes zero sense to me. Not sure if I'm mistaken but it appears you are still doing this method yourself which confuses me even more.

If you're experienced in e-commerce you would know absolutely nobody is willing to wait that long Just found this cool username and switched, profiles have a username history, i still use the same skype and i'm still named 50 Cent on skype, also my contracts clearly went smooth.

I'm selling very limited to prevent saturation, hundreds of people using this could potentially saturate, not 6 people.

People are willing to wait, that is because of the extremely cheap price that you can offer while still having a high profit margin, also nobody forces you to dropship tho.

This is not a method.
