Thread: [\[Legit\] \[Affordable\] CS:GO Boosting Service](#)

Nostalgic - April 16, 2019, 11:07 am

I'm @Nostalgic, I've been playing Counter-Strike since 2006. Started playing Counter-Strike: Global Offensive in 2012. I've been with some boosting services before but I won't do it again. Even if your boosting provider says they are legit and won't cheat on your account, they'll still do it. We were forced to use cheats as it boosts the accounts faster and the faster you can boost accounts the more money you'll make and the company.

Therefore I'm starting this CS:GO Boosting Service. It will be affordable, legit & customizable. I don't want the fastest boosting service nether the most expensive one. Just an boosting service that is legit and also affordable.

What do you mean by "test game"? If you're talking about the vouches it's only for respected members of the HackForums community.

I can't really do anything about it, but if I had no cash and was 15 I'd do the same.

Are you able to boost on leagues?

Depends on the league, I'll only do FacelT and ESEA. Other leagues have bad anti-cheat systems and cheaters are in the mid to high tier of ranks in those leagues.

Gotcha. No flame or anything but you'll boost in MM but not leagues other than those 2? I feel like you'd have a better time in any league than MM

It's true I'd have a better or rather more fun playing leagues. But the problems with leagues is if I boost an account to high tier the customer won't have a fun time playing later then. If he is mid-tier and buys boost to high tier he won't play any good. MM rank boosts are more for people who smurf and want to rank their smurfs but won't put in the time to do it. Rather then to get the "bragging" right that they are in a high-tier league.

Sadly I'm looking for more respected members of the community. But I'm thankful of the question.
