Thread: [Restaurant PoS System](#)

Gonzalez™ - April 17, 2019, 11:46 am

Hey peoples,

Hoping someone could assist/ point me in the right direction. Looking to make a Restaurant PoS system That doesn't run me up over 1500 bucks for 2 terminals + 1 terminal/register.

Thanks! :)

Make or purchase?

I wouldn't recommend making one if you don't have the sufficient knowledge for it.

couldn't you just use square cash ot whatever?

along with a cryptocurrency such as btc lightning

and paypal

or am i smoking crack

If it wasn't an extremely painful task to make one id like to learn to make one. However if it's easier to buy one, ill go that route.. I found one I liked however it's 800 for 1 license. 250 for each additional.

I found one I liked however it's 800 for 1 license. 250 for each additional. Making a POS system from scratch is absolutely the wrong choice. Go with something like Square, or find a SaaS application. If you have a few minutes to spare, check out <https://www.capterra.com/restaurant-management-software/>. Might or might not come up with something meaningful that matches your requirements.
