Thread: [NTP and SSDP and DNS and Memcache filtering methods](#)

Cookiesa - April 18, 2019, 4:23 am

Good evening, everyone.

I want to learn how to efficient screening of the most effective, the NTP and DNS and SSDP and Memcache list method, can will increase their reflection ratio very high, if you have a very effective filtering method, please contact me, I really hope hackforums every relatives and friends, can help to me, of course I am willing to take money to learn this way.
