For the first time playing bustabit, I think I'm doing pretty good. I believe I've found part of a pattern in the way it crashes. Started at \$50

Nothing there is profitable in the long run. No pattern will win in the long run. Seen far too many people lose far too much on that website because they think they've found new methods of beating the system.

It's time we take back from the house

Nice mate

I would suggest you invest some of your profits in the bankroll of the site (become an investor)

You gonna get some steady income as you should know the house always wins, so be the house
:P

The last few weeks I have lost my ass on both bustabit and bustadice. Scripts that were very profitable have crapped on me, and manual play has made me slightly crazy. Glad you are having some luck
