This is the post i bought from showthread.php?tid=5962251

I added him on telegram, and asked for \$17 paypal for \$17BTC. I sent him a \$15 itunes gift card instead in exchange for \$15 BTC.

I sent him the code instantly, although he said he sent the bitcoin i never recieved it, and now he ignores my messages on telegram and keeps on making post to exchange btc to paypal.

I can provide screenshot proofs if you PM me as i can't post links or pics as I'm new.

Although this is a small amount, i wouldn't recommend anyone working with this person!

How did you find his telegram?

You were scammed by an impostor then.
