Thread: [How can I bind two exe files together?](#)

UrBoiCrust - April 22, 2019, 7:26 pm

I wanna bind my rat with a csgo cheat injector. Ive been browsing a lot and tried a few methods but havent seemed to get it to work. Any help appreciated, thanks.

I suggest you do that while crypting the first file. Otherwise you will just end up with detection problems.

CyberStrike - April 22, 2019, 7:42 pm

IEXPRESS or copy /b are options you can also use a packer other than UPX which packs just one file.

UrBoiCrust - April 22, 2019, 7:44 pm

I tried using iexpress when I opened the file afterwards and go into csgo the cheat doesn't pop up.

CyberStrike - April 22, 2019, 8:08 pm

hmm... post install command what did you put? The install program I know already is the cheat, do you have process hacker open when doing this I am assuming this is all on a VM and NOT on your main machine.

I test it by running it sandboxed. Is it possible it is failing because the cheat itself is a dll and i binded a injector that is separate from the cheat? I believe I put the injector has the post install command.

ehm .. use a VM (it's free and from microsoft) sandboxes are not as safe as you would think. Next you what don't actually have a working program (the cheat), even if it is fake and doesn't actually work? When you say injector I am guessing (probably wrongly) that you what are doing process hollowing and injecting said dll? Please explain me guessing isn't the best way to have us figure out why it's failing. Because right now I am honestly thinking you have a dll that isn't being called up anywhere and thus why it's failing. Once again explain what's going on .. if you need to windbg and a VM see what's happening hook into the "injector" and process which the dll is being injected into. What version of Windows and what AV's or security solutions are in play?

hello friend

there is simple solution

just send me ur files

and i will bind for you

there is special offer today

you send 2 files

I bind 3

there's one more

for free

Sounds like a deal 2 for 3 ... ?

(I gotta say this user is comical)

"Special offer" "Bind 3 files" ? ? ? ?

You don't even know what a ps1 format is.. You thought it was a PS1 game.. Nice try ?

Actually he thinks rats from 2012 (Turkojan/Lost Door) are good

When MSN doesn't even exist anymore

And he wants to bind that to your file thinking no AV scan stop it then..

I was using randominjector (open source). When I used it before binding it worked. I have windows 10 and my AV is McAfee but it's disabled.

CyberStrike - April 23, 2019, 4:55 am

Okay my questions are still there, but yes the binding is probably the culprit. Go make a VM and go hook windbg to the process see what is going on have process hacker running. Use sysinternals process explorer/procmon/sysmon/handle/filemon see if it's actually extracting the files. It may take a few attempts using different tools to see what is going on, this is normal. It's all free if you want I can start to guess that's the only option I am being left to, I don't want to just guess that doesn't help you.

<https://developer.microsoft.com/en-us/microsoft-edge/tools/vms/>

<https://docs.microsoft.com/en-us/sysinternals/downloads/process-utilities>

<https://processhacker.sourceforge.io/>

frank3 - April 23, 2019, 3:49 pm

You need a file binder look around at github.

BestFwend - April 24, 2019, 6:12 am

IExpress is what I used to bind mine and it worked fine

UrBoiCrust - April 24, 2019, 5:37 pm

What other file did u bind with

BestFwend - April 24, 2019, 5:47 pm

(Apr 24, 2019 05:37 PM)UrBoiCrust Wrote: [\[CITE\]](#) What other file did u bind with

I dont really understand this question. I used my malware and some simple java program that popped up with a message saying "Installed!" but of course, (not really). Iexpress packages the two file together and is very easy to use on Windows 10. Just do a simple google search

shindog - April 27, 2019, 7:17 pm

I'd encrypt the file to do it

xtdozo - May 8, 2019, 12:01 am

Search online for a file binder

Fr33d0m - May 13, 2019, 5:54 am

Honestly download a file binder it will be the easiest way. ?
