Roky's OP Bustadice Script (300\$ IN 2 MINUTES)

RECORDED PROOF: <https://www.youtube.com/watch?v=nx2YTM3kZxc>

If you dont believe this is me, check my profile: <https://bustadice.com/player/Roky>

All together that's 710\$ withdrawn, and it's only been 2 days (approx. 1-3 hours)

It's almost scary how much profit this script can make, one of my friends has even earned around 1,000\$ from this script. It's literally free money coming your way. Now it just depends on whether you're willing to earn this free cash.

I will only be selling limited copies [around 20-30] as I don't want to risk this script getting shared around.

I will be selling this for 35\$ BTC ONLY. <https://shoppy.gg/product/wekveDQ>
Vouch copies will be given to those whom I trust, so please if you're low repped etc, don't bother messaging. Thank you!

If you end up losing your money, you will not be issued a refund.

This script isn't 100% guaranteed money, there is a chance you could drop to zero.

Please deposit a high amount such as 10-20k if you want a less chance of dropping to zero quickly.

ALWAYS keep an eye on the script as you may drop fast at times.
