Engagement is the solution.

Tell users something like this if you are doing CPA

To make this <Whatever Your Niche> MORE PRIVATE we need to verify users.

To Verify:

- 1.Like The Video.
- 2.Comment your YT Username.
- 3.Subscribe to the channel.

This way we will whitelist you to use our stuff.

I Hope you get what I am saying.

Just throwing up a video and hoping it sticks and gets traffic is long gone. The algorithm is based on engagement & relevance.

It's a catch 22 situation you need views to get engagement and views are hard to come by if you're not already popular.
