Thread: [award count glitch](#)

Lavish Living - April 23, 2019, 10:05 pm

On my profile it says I have 50 awards,

However, if you perform some simple arithmetics one will see that I have 8 full rows of 6, and 3 on the 9th row. This yields $6 \times 8 + 3 = 51$.

I assumed maybe this happened to everyone who lost their diamond of r00t which got reverted to an ub3r sapphire, but after checking a few accounts, I saw their award count was correct on their profile. Not a big deal, but if it's not rectified within 24 hours I will pursue legal action. I can't be seen having the same number of awards as Kill Joy on our profile pages... when in reality I have 1 more than his sorry ass! ?

Thank u, next.

? ? ? ?
