Thread: [Paying \\$300 Monthly for a Static/Dynamic Private Stub Crypter](#)

Non Serviam - April 24, 2019, 3:06 am

I will pay \$300 monthly for a crypter that can bypass the following A/V's on static and dynamic

I will use #, or warzone, also I test with dyncheck.

360 Total Security

AVG

Avira

Avast

BitDefender

ESET

MalwareBytes

Norton

Trend Micro

Windows Defender

Symantec

Kaspersky

Would hope to have it updated weekly, but if it stays FUD well then great.

Do not contact me trying to buy your \$500 stubs or \$1500 crypters. Thats bs.

Im willing to pay \$300 a month.

Chat me up . Lets make a test crypt and scan it runtime and scantime to confirm fud and test confirm works too then you buy

savaged. - May 24, 2019, 8:37 pm

can offer you a scantime FUD crypter with minimal runtime detections.

Looking for the exact same solution.

May I ask did you found what you where looking for ?

If so... Please share the contact... since most of all sellers here are scams maybe you can help a brother out.

Why is a \$1500 crypter bs to you? If you are spreading and it needs to be re-FUD daily or every 2 days, you should pay \$100 every 2 days atleast.

If you want a re-FUD every week and you are barely spreading buy \$100 private stub once a week?
