Thread: [where can I find real 0day exploit ?](#)

LayersOSImodel - April 24, 2019, 7:40 am

Where can I find real 0day exploit that costs more than 2k \$. ?

Pm me please.

[contract=tid]Start Contract[/contract]

I have 0day exploit for one website and i can show you via teamviewer what it does and how you can make profit from it.

telegram @DNSLeak

TCP - April 24, 2019, 12:13 pm

OP be careful when dealing for this kind of stuff, everyone seem to be a hacker today...

He has to be a highly skilled hacker because I also see him posting everywhere claiming he can do

everything
Interesting

telegram @DNSLeak
i won't buy anything at all here from anyone even high profile even well experienced HF user, what i want is someone who knows where to buy 0day exploit, not someone who's selling it.

int - April 24, 2019, 1:32 pm

probably that one other russian hacking site that starts with an e and only lets in russians for 100\$

DNS Leak - April 24, 2019, 1:45 pm

I'm just trying to make some money i know a lot of things. I never ask upfront payment so there is no reason to call me scammer.

even if someone here on hf have a real 0day exploit, he won't sell it here XD.

if i had a 0day exploit i would never sell it on hackforums -,-

then you will not find anything cuz there are no legal place for this kind of stuff you find it with connections only not even exploit.in
what make it take 100\$ that they understand they have strong connections there

finding 0day exploit not that hard and many of people here have 0day exploits but also you are right
" no one would sell it on HF "

Make sure to use middleman for deals with untrusted members, I would suggest my boy [Zexi](#).

Far too many people attempt to scam for exactly what you are seeking. Take precautions, make sure you get full details of what you are buying or view a PoC video. Best of luck in your search brother.

Thanks Boss, I hugely Appreciate, Please if I may ask, is the middleman in this forum moderators or have admin license, can they be trusted to broker a deal with the right dealer?, I am new here

and I don't want to be scammed because I have lost money in other exploits. I appreciate you a lot.

I don't know if my word means anything, but I have personally dealt with Zexi in the past. As well have witnessed a user attempted to scam through using a middle-man (zexi) in which case he handled it more professionally than any escrow/middleman service I seen in my life.

There used to be an Admin who did middleman service, so I've been told...but do not think that is a thing anymore, just a thing of the past. The problem with staff being middleman is then they are in the forefront of trades/deals. They have to moderate the forums and constantly on here, as if it's a job/career. Adding another thing on to that, which requires them to be responsible for, would just drive them to never want to be on the forums IMO.

There are definitely many middleman on the website you can trust, although I would always do research in to them beforehand. A good rule of thumb is I will read their posts, over the past 6 months to year and decide if I like them as a person. If I think their morals are correct, and they seem like a good person, I would trust them.

Of course, there is only so much you can do to take precautions to prevent being scammed, at the end of the day mistakes still happen.

I would suggest you to use Zexi as then you are minimizing the risk and dealing with a professional member.

Also take the time to read through this [Contract Policy](#) to get a better understanding of how the contracts work on this forum. They are extremely important to understand, and help you to report members who may ever scam or mislead you.

Then other members can view it forever in time, and steer away from those members. In some cases I have seen members get banned. ALWAYS communicate on-site. If you open a scam report with messages from Skype or likewise chat services, the staff can not take it as valid proof. If you communicate through private messages, then the data is there for staff to view and confirm the legitimacy.

do you have any lead how I can get Oday?

I dont write Odays or even have access to them

Mohinder - May 2, 2019, 12:23 pm

The DNSLeak guy just asks on Telegram to show you something on TeamViewer and then runs some Power Shell on your computer. Unlucky for him he was inside my VM.
