Thread: [MinerGate Silent Miner \(Hidden\) - XMR Miner CPU 2019](#)

.?.ZyL£.?. - April 24, 2019, 8:58 am

1. Silent (hidden)
2. Works with another cryptocurrancy in minergate.
3. Startup (when windows starts miner auto starts.
4. Can manage CPU how much you want use.
5. Link To Get *****
[Link SilentMiner](#) *****

Finally my friends i find working minergate silent miner!
I'm will share it but remember i'm not coder or smth better i'm new in HF and only learing everything what i see in here,searching and using!
(Copy Rights Tigerzplace) i found him and when i got some questions i was contacting with him he answered and helped me using teamviewer.
So i'm very happy for that man , maybe more like him i found here!

Miner And guide writed and how to use is showed in video! All Links will be shared!

Okey starting about miner - Tigerzplace words:

In this article blog I'll be sharing my own Monero Silent Miner for MinerGate. It can be used for any coin but for this tutorial I'll be just sharing silent monero miner (XMR Miner CPU) . Its FUD and Hidden XMR Miner For CPU which once started will mine monero (XMR) for you and it will be collected in your MinerGate profile. Secondly the good thing about the miner is that it is persistent like if you restart your pc, the silent miner will automatically start in the background silently.

Now for me I am sharing this if you have pc/laptop other than your own used pc and want to make money online using that pc, so the best way off course most users are using it as a miner so it can mine cryptocurreny. The same case is here if you want to setup your own silent miner so you don't need to start it every single time but just for once run it and it will run for ever until you stop it.

Guide :

First thing first, you will need MinerGate account, here I'm not going in detail what MinerGate is and how it can be used to earn money. In short it helps you to mine any cryptocurreny and you don't need that extra pool setup and all those technical stuff but just you make an account in MinerGate and download their miner which starts mining using your pc but that's not too good if you want mine silently or on another extra CPU you have but don't want to run the miner every single time. So for that I'll be sharing my MinerGate Silent Miner (XMR Miner CPU) which is Safe, Fast and FUD. You can find multiple online monero silent miners but the thing is most of them are binded, some are fake and some do have their own percent in the miner while my miner is purely clean and safe. I made it with some vbs and batch scripts. Other than that I used xFast Minergate cli miner which is much more faster than others. You can check all my files and even can replace it with latest miner if minergate release by the time you are reading this article but for right now its working and undetected so Anti Virus won't create problems if you want to run it on your CPU. So that was about the Monero/XMR silent miner and MinerGate. Let's have the silent miner now.

Once you got your account in MinerGate. Now the next thing is you will need to download the miner.

MinerGate Silent Miner (Hidden) - XMR Miner CPU 2019 *****

Once you got the miner just extract it using WINRAR. Make sure you got winrar as we will need this further for just one point. You can download winrar from rarlab.com

After extraction you need to setup something. To use XMR Silent Miner [Minergate] by Tigerzplace you need to edit "start.bat" file.

Right click on "start.bat" file and click edit.

Then replace "pbpawr2gbg7rttj" with your email which you use for mingergate account.

Save the file and now just open the miner file with Winrar and drag "start.bat" file into the "XMR Silent Miner [Minergate] by Tigerzplace.exe".

That's all for the setup. Now just open the miner and it will start mining for you. You can check you log in your minergate profile.

Keep in mind that it will take some time to update the worker and hash rate status in your MinerGate account.

[Closing] - If you want to stop/close the miner. For that open TASK Manager and go to processes or detail, there find "win" name in the list and close it by right clicking and pressing "End Task".

As I said it will be persistent so as you run the silent xmr miner (xmr miner cpu), after your pc restarts it will start mining again in the background so you won't need to restart it again and again. You just need to run it once.

Well that's for this tutorial. Hope you guys will find it helpful. If you find this silet xmr miner (xmr miner cpu) not working any more in the future. Make sure you let me know in the comment section or on my page so I'll update it for you guys.

All Copy rights Tigerzplace

Remember i don't can share here links and photos and still dont can PM so everything you will found *****

Don't use bad words, no problem :)

air1 - April 24, 2019, 4:47 pm

Pardon my ignorance but what's the difference between this and regular Minergate? Does this start on boot and hide itself? As in the GUI doesn't come up and there is no icon in the sys tray?

It's no hidden secret minergate skims 30% of the hashing power of a normal miner. Does this also do that?

.?.ZyL€.?. - April 24, 2019, 10:37 pm

do that?

Yes its regular minergate miner but now he is silent you can use victim pc or school pc's its autostart and hidden. Using 2CPU if want 1 cpu or 3 cpus mine just change in start.bat file (---xmr 2 to 1 or 3) also he can mine another cryptocurrency just change xmr to btc or something another what you want.

SuperFux - April 26, 2019, 3:13 pm

Hay pls pm me i need help windows defender detect this as Virus
Ps THANK you for sharing :)

.?.ZyL£.?. - April 26, 2019, 10:40 pm

From this silent miner is ok no virus but minergate official files is showing virus you can check it download from minergate and you will see its blocking too so turn off defender when use.

Ps THANK you for sharing :)

If you read my theard i was writed i dont can write PMs so just write here i will reply in 8 hours max

SuperFux - April 27, 2019, 2:18 am

ok yes I have the problem that the silent miner the whole time as a threat is recognized by the windows defender

.?.ZyL£.?. - April 27, 2019, 7:12 am

(Apr 27, 2019 02:18 AM)SuperFux Wrote: [\[CITE\]](#) ok yes I have the problem that the silent miner the whole time as a threat is recognized by the windows defender

Maybe on day official miners will be fixed because it's official program and have viruses showing on antivirus i hate that...

I still searching crypter for minergate programs if i found it i will share here sure :)

SuperFux - April 27, 2019, 7:39 am

Thank you and here for all add this to the setup.bat

Reg add "HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Microsoft\Windows Defender" /v

DisableAntiSpyware /t REG_DWORD /d 1 /f

Reg add "HKLM\SOFTWARE\Microsoft\Windows\CurrentVersion\Policies\System" /v EnableLUA /t REG_DWORD /d 0 /f

after restart Windows Defender and UAC are disabled :)

Good one, but we all need better thing if we spread miner for victims we need to crypt startup.exe and win.exe for don't show virus , here in HF crypters is not good because many people using and try on virustotal so i'm searching on darknet maybe find some..

SuperFux - April 27, 2019, 10:49 am

I pray for you for eternal health if you find one :)

I found this one Crypter but don't can try because i'm still in jail hard to get transfers for it. But maybe someone test it and will check if working!
HF forum search coak crypter.

SuperFux - April 28, 2019, 7:35 am
Link does not work "www*sowernal*com/1e9o " i replaced * with .

.?.ZyL£.?. - April 28, 2019, 7:47 am
try without www
i found this in HF so we need try to crypt this miner and check but interesting comments on that crypter ..

SuperFux - April 28, 2019, 7:55 am
EDIT

.?.ZyL£.?. - April 28, 2019, 8:18 am
Crypter is someone from HF and saying working with miner need try with miner to crypt minergate files ?

SuperFux - April 28, 2019, 8:39 am
EDIT

.?.ZyL£.?. - April 28, 2019, 8:46 am
Don't hate me for my mistakes, i just wanna help for people man.

SuperFux - April 28, 2019, 9:02 am
EDIT

ignore that I misunderstood something it is all ok

win.exe in what is it coded .net c# c++ ?
so i can help to search for crypter

.?.ZyL£.?. - April 29, 2019, 7:08 am

Win.exe is C++
its native, not .Net

SuperFux - April 29, 2019, 8:54 am
I think I will try this crypter afterwards
<https://hackforums#net/showthread.php?tid=5776088&pid=58521599#pid58521599> # is point
.

or have you already tested this?

That is old theard don't tryed

SuperFux - April 29, 2019, 9:41 am

sry i dont understand this so i dont try cyber seal ?

.?.ZyL€.?. - April 29, 2019, 10:21 am

(Apr 29, 2019 09:41 AM)SuperFux Wrote: [\[CITE\]](#) sry i dont understand this so i dont try cyber seal ?
I say i dont tryed , if you try this crypter say what you get mate :)

SuperFux - April 29, 2019, 10:30 am

ah ok thanks then I do not buy the but it is really a pity that there is no decent crypter; (

there is no good crypter here

.?.ZyL€.?. - April 29, 2019, 12:28 pm

Yes , i was found one theard here how to sell crypter or rat.... if you find when read after that theard
i think put my money back in my wallet is better idea then give away ..

.?.ZyL€.?. - May 24, 2019, 4:47 am

Maybe who was using find working crypter ?
