Thread: [Selling source code for pixel based automation bot \[C#\]](#)

Kold Flow - April 24, 2019, 1:38 pm

Source for Pixel-based automation bot written in C#

The source is absolutely private and authentic.

Features:

Written C# and Visual Studio 2017

Great for Any Kind of Automated Task Management (i.e CPA, Email creation, account creation, pornbot)

Spam with Dictionaries or Adjust Rate of Spam (i.e. First & Last Name/Password Dictionary)

Game Automation (Automatically complete tasks in game, create game accounts etc etc)

Easily Modified (Tasks easily created and Automated)

Captcha and reCaptcha solved (2captcha API calls)

BTC payments accepted.

Only 1 Vouch Copy for \$550

Only 5 Copy's for \$1100

In the following example, the source has been slightly modified to create emails at outlook.com

I don't get it, the video you linked is about creating emails, how does this relate to game automation?

Djazairi - April 24, 2019, 2:13 pm

There are already made plugin for example pyautogui for Python sir but good sale nice work

Any game that uses mouse click/movement can be automated the same way with minor modifications, mostly talking about browser games here.

This bot has quite a bit wider implementations than what pyautogui offers by itself, and again it's a full source code, with captcha api calls, automatic vpn connection, etc.
Apples and oranges my man.

Hey yeah I have a vouch copy, but I'm looking for someone more trusted atm, so the review that he posts has its value and credibility.
If no one comes forth I might hit you up to get things started.
And yeah the bot is great for cpa, I would help you get it going and answer your questions, but wouldn't obviously recode the bot for you.
