Does the .edu email have student in it e.g. johndoe@student.xcollege.edu? Or is it just the college name at the end e.g. johndoe@xcollege.edu, johndoe@mail.xcollege.edu.

I do not I would need this in a lot of places if I have something like myCurrentEmail@someUniversity.edu because myCurrentEmail+blahblah@someUniversity.edu would be typically perceived as a unique (i.e. distinct) email address although it is the same email address (i.e. anything that falls after "+" is simply an alias to some underlying email address).

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Added you on Discord, under the username Rythm.

Discord is the way ?

(Apr 24, 2020 11:39 AM)PewDiePie™ Wrote: [\[CITE\]](#) Paid. The transaction was smooth. Can vouch for professionalism.

The longest part of the transaction was waiting for the blockchain, everything else was basically instant.

EDIT: Looks like most sites are not accepting the address provided as a real EDU address. Looks like a lot of places know that someone is selling/sharing access, and are asking for official documents. Disappointed.

Oh that's something that's happening since a few time ago. There are methods to get the extra requirements but here we deliver the Edu email, that is one of the requierements.
