Hi there, I don't get why you need to host it somewhere? Why not build it locally?

Looks dope though, glws op! ? Office Exploit Builder is unlike any of these other crappy builders that appear and disappear quickly. We have been around since 2014 and have updated pretty much every week since release. Buidler Version 7 will be released in the next month too, we offer support via HF, email, support ticket and of course Jabber/XMPP.

Feel free to contact me if you're interested and I'll reply right away. ?

You said uploading 6.9.0.0 version right now, 1 hour ago, and the version is still 6.8.2.0. Yesterday you said that an update is coming in 30 minutes, then when I email you, you said in 1 hour, and its been more than 24 hours still no updates. Honestly, I was very pleased with your service a few months ago, I purchased again in the hope of the same service, but it's been 2 days since I am trying to get a version that bypasses Win Defender and I haven't been successful as you constantly claim to upload updates, but never do.

Do you have lifetime package or 6 months/ 1 year?

1 month is expensive for me

He's obviously been working on private hosting for only when Lucifer knows when? I bought this product and nothing worked, I contacted seller and he told me it was my host, for a month now he has not been able to fix anything and any time I write him, it's one story after another.

This shit is not working and that is it, if it is, he would prove it by attending to people that bought, giving people free month or weeks when a product is not working is useless.

As I've told you before, your file isn't executing because you are using a host that doesn't support direct links. I've told you this several times now and recommended some places for free cpanels.

It means you can only compile new builds for the month, whatever builds you have left when the month expires will work forever as long as your link stays good.

The reason for the detection's is because we had an abuser.. I had to find and remove him before updating. I have found him now and working on another update, but since you decided to flame on the thread, you've broken my ToS. So you will not be able to access the builder.

can send me more info? best regardS!

H4x10r - July 4, 2019, 11:36 am

Ok so here we go sad to say but :

I ordered his office builder a while ago , installed the tool on a fresh system with all updates.

When i try to use the product and make some settings , it crashes or shows some errors , ending in not working.

i contacted him and he is just playing on time , he does like he would help and support ,but he doesnt anything.

He is just asking for screens and the infos again and again , not replying , starting converstations and then just let the customer wait for hours or days.

I had already an dispute open , but he asked me to close it , before he will help me, was the same with my comments on the Selling tread.

So i was forced to close the dispute or comment to even get support for a problem that exsists! i still cant use the product till jet!

so even if you bann my licence again and again i dont care anymore , tool is not working for me anyway.

Will buy another one with better service and support and product.

Your not really helping , waiting 3days now still no real solution , just asking for screens etc. Here are some proofs:

thats it

crypter was also not loading and it had also about 8 detections (WordDoc). You are the most impatient person I've ever come across, you're acting like a little child.

You only sent the screenshots of the errors YESTERDAY, I asked you to translate them because I don't speak German, and you went crazy, flaming me. I can't copy the text from an image to translate, I asked you to do a very simple thing so I could find the reason for the error and help you fix it, and this is how you reply? Pathetic.

Funny how you say it's highly detected, yet there's no scan link. ?

You're a liar.

H4x10r - July 4, 2019, 1:13 pm

You're just playing with my time with contacting me saying you will be there, then I am waiting hours nothing.

now after the post... uuuh you care again, that's all, the most error boxes are even readable in english (when you know what you are searching for like line etc...)

i also translated it for you already while ago in the chat

i made a video, i installed it on two different systems and i reinstalled office versions.

nothing works your tool also not working and not fud.

I told you earlier today that I would come and help on teamviewer when I'm online later (Now), and instead of waiting for a few hours you flame the thread and break my ToS. Grow up.

H4x10r - July 4, 2019, 1:50 pm

Yes your super help waiting for hours , there are two sides , normaly a customer , doesnt have to translate shit or so and even without any german u could read line number and so on .
we are just playing , and i dont care about your shitty ToS.
Im grown trust me , but your business is shit , never had problems like this before
even changed machines etc , its just a big time payoff rippoff , i will help you later , let the customer wait storry.
We will go different ways , so i dont care about you and your products anymore.
But other people should decide on their own , what support and service they want and how it should work out.
if you are a professional seller , and you tell a customer you will be there soon its not more then an hour .
have a nice business with that tool. as i said i will buy another .

Why should i lie , i have paid a bigger amount to you, and i would prever the other way , the working tool way, but thats not the way it went. and now thats the service i get for the payment
so sure customer is pissed off , and you even play again with his time and again.
Also you had a video before and also screens , its just easy as fuck to understand what the error says ...
but ok just push away my post to clean up :-)

there are no lies and i dont have to be understandfull that u hold my time and waste it for any updates , its just one story after another , please people just check the pictures we have been in contact for so long and i saked for you so many times

as a customer i should also have the right to say what happend to me with you and your service , tell people its a lie ok.

But im not that dump customer that will wait for someone who just says will be there soon , and when asking diretly what does soon mean to you no reply.

so you dont really want to get us together or we already had our teamviewer session, so that you can have a look on the german notis , you cant read.

as i said i dont give a fuck anymore about your shitty tool. but dont call that a lie ... nobody would do this game , just change seats and think about it if you bought that tool and i wouldnt work and you would try to contact the guy and he just replies for seconds , playing time and so on

Your product is burned even if you update it 1000 times, Runtime is detected, and your service is rubbish, I already told you, you only know how to make excuses, "Today a car ran over me"
"Today I got hit by a truck"
"today I fell from a horse"
People don't publish the truth for fear of losing their license, but I don't care about your license, there are many other vendors that are worth not like you.

 3. You lost your money because you're an idiot and instead of asking for help or opening the builder to update, you decided to break the ToS.
 4. Yes I disputed the contract, you are pathetic. You are breaking my ToS AND HF's rules by flaming.
 5. What are you talking about mediafire? I coded it from scratch, how would I update it and add more features if I just downloaded it? Moron.
 6. I do not cheat people, if you listened to me you'd know the truth. I am a good guy that likes to help people.
 7. You had one problem, I told you how to fix it 4 TIMES and you flame the thread.. What is wrong with you man?

Please PM me so we can resolve this. I'm sick of you lying on my thread, you're acting like a little child.

Do you think people buy your product and refuse to open it?

That's what you're saying, I was asking for help for a week, and you only knew how to say that you would solve it, that you had an accident.

Talk to you privately before writing here, do you want me to post link to the images with what I talked to you before writing here?

A week opening the shit you sell is not enough?

Should we open it two weeks?

If you want, I publish images of the messages to see who lies, you or me.

I don't like to stain anyone's thread but you are a true scammer.

Most open disputes are from idiots that broke the ToS and got banned, so they disputed, It's entirely their fault. Some dispute because I was cooking dinner and didn't reply for an hour, you have no idea what it's like selling here. I've even had people start a contract by mistake and dispute it.

They broke the ToS by abusing the builder/flaming on the thread/many more. Read the ToS, and mind your own damn business. Now leave me alone.

I've disputed the contract too, PM me to resolve.

The icon of the file is from VBS script too and extension is just spoofed(anyone can do this in 5 seconds).

False advertising of course

Maybe, but it does not change the fact that you are FALSE ADVERTISING. You are selling VBS script, not SILENT EXPLOIT.

There is a clear evidence in the disputes against you. Your "real doc/xls exploit" its just a VBS script - VBS ICON and spoofed extension - it looks like this -> filename.DOC.VBS - Hahaha REAL EXPLOIT :D:D

It was never broken, just needed an update, updates take time especially crypter updates as stub is much harder to reFUD. Now you are flaming on the thread because you are impatient. (Aug 27, 2019 02:46 PM)IncLom Wrote: [\[CITE\]](#) Did you have a contract with him?

If yes open a dispute

I did, he had me close, look up his wall it's more than 12 dispute, He is untouchable .

Only NO\$ was the only top guys to even talk other are afraid to talk.

So that's how shitty this place has become

To who ever that is concern and may be concerned below is the details of chat I have been on with this guy for a month now, at first I paid \$70 for public stub that didn't work, when it started working he never updates, I asked Him for private stub, he said he can do it.

Asked me to extra \$100 which I paid He said in 24hours hours.

after like one week same story, he gave me one thing when I built I had 7/25, he blamed me for scanning on avcheck, a freaking paid scanner, that I must use spyalsacnner which is a free one.

Tha I just ruined my stub, I was like this guy are you okay?

even if it's VT that distributes, you just gave me stub I scanned and you said I ruined it, He said he is looking into it to clean it up. after like 4days, I write Him and hE REPLIES IN 42hours and so on.

I asked for refund for like a week now his brother dies, his nephew always been reborn and doing birthday, and Him been busy, vacation, his uncle just died, just got back and will refund now.

Common man! are you for real?

That was how he tricked me to close a dispute again't him. after I posted here today, He came again with that same format that I should remove my comment and He will refund me and I said now, after all you never going to refund me.

Does it mean that Omni can't ban this guy? who else on HF has 12+ here and still selling crap? is this a pure support for him to rip people?

I don't care if my account get banned or what but atlas someone have to be an escape goat for others to be free o ain't that what we supposed to do?

After all all the freedom fighter that died, died for our freedom.

Anybody can call this sales trashing but I don't give a damn, but before you do that, be ready to refund me my \$170

WITH ALL DUE RESPECT AND ON BEHAVE OF THOSE THAT CAN'T SPEAK FOR THEIR SELVES.

I'm calling on the good guys of this community to review this guy and if He is guilty support that He is banned from this Forum.

PLEASE IGNORE THE USER myxhaka, HE IS A LIAR AND A FRAUD.

He bought the normal stub, which had over 6 updates while he was using it.
Bought a private stub, which I spent a few days coding from scratch for him to scan on a site that
distributes and ruined the stub, I said I'd fix it for free out of my good heart, had to spend a few more
days coding ANOTHER stub for this asshole.
Brother died, uncle died? What the fuck are you talking about you lying scum?
I did not trick him to close the dispute on me, he closed it himself and said sorry to me because he
knew he was wrong.

I have been busy with family, yes. That's all I said. I said I'd have his SECOND stub ready very
soon and he demanded a refund.

So I said fine whatever, even though I've just spent over a WEEK coding you TWO private stubs
because you scanned somewhere I said not to and ruined your stub.

I asked to send his BTC address, I was just about to refund and then noticed a new post on the
thread - his absolute bullshit post, which is a complete lie.

I am shocked at your behavoir, you;'ve now broken my ToS several times so I suggest you read my

So, I bought the software and I will give you my honest review.

This is NOT click and your done!!!!

So, if you have problems, (like I did) PM Mon3y, he does respond. I musta emailed him about 12 times in a single day and he responded to each one. Even when I told him in pm "dude, I'm done" HE kept emailing me says "did you do this?? what about this?? " then he said message me and send me Teamviewer info and I will do it for you so you can watch.

So, this guy is legit, the exploit works. Make sure you by the one with the silent enabled, this avoids the need to enable macros.

I've bought a few tools on here, when they don't work I tell the person it doesn't work and enjoy life with my money. Again, this dude is the only one that took that from me and kept trying to help me until I let him.

Filthy scammer.

Phantom Aboki - October 13, 2019, 6:39 pm

Finally the scammer is banned.

When I warned, no one listened.

This was one long scam seller HF allowed for a very long time.

Dude you act like your opinion now mattered, people were buying it even though he had like 10+ disputes open.

I know how many folks I sent PM warning them about buying this product.

I had a long standing battle with the seller when he scammed me and lied that I broke his TOS. Until he refunded me, but I never stopped warning others. So yes, I contributed in saving a lot of people from getting scammed.

Lol but people still bought even when they see 10+ disputes open???

It's kind of obvious that hes a scammer to even the most dumb people

It's a coincidence all of the buyers have "broken tos multiple times and flamed thread and tried to reverse the software"

LOL.

Irony of life.

Its funny how some people saw lot of red flags and still went ahead to buy, only to complain after a few days.

There will always be dumb people ?

He favorite line when a buyer complains of product not working or getting too many detection is "you broke my TOS" ?
