This is the average internal P2C lifecycle from what I have seen since joining this community in 2014.

- 1.) OMG COOL NEW CHEAT
- 2.) Everybody buys cool new cheat and sucks cool new cheats dick
- 3.) VAC WAVE
- 4.) VAC WAVE
- 5.) VAC WAVE
- 6.) VAC WAVE
- 7.) A year or two later..... COOL NEW CHEATS SUCKS, IT'S VAC DETECTED 24/7 AND THIS NEW NEW COOL NEW CHEAT IS SO MUCH BETTER
- 8.) Rinse & Repeat

So really, who cares? If you buy a publicly available internal cheat you're gonna probably get VAC banned at some point within the next 1-2 years at best anyway. It's almost pointless to even bring up detections under the circumstances.

Why not? Tons of features, cheap, been around for long ass time and if you don't give a fuck about the fact that it probably will get detected sooner or later (just like any p2c out there) and want to have fun on smurf its really great cheat to pick.

No, I don't use it or any other p2c but theres a reason for you. Inb4 "MY BEST CHEAT IS NEVER DETECTED!!!11"

WinA - April 28, 2019, 4:15 am

I don't currently use iwebz anymore but based on the replies i'll leave my personal review on it from the last time i used iwebz(Been nearly a year now).

Iwebz used to be my go to provider for a long long time (spent hundreds there) they have all the features you need and more with some of the best settings/setup i've ever used.

Their hacks work exactly as you expect. As soon as you tick em.

Many hacks including the one i use atm have insanely odd aimbot settings so iwebz is probably ideal for any new cheater or someone that wants something that works and easy to set up with all the features to try out.

Why don't i use them anymore?

Security. Nothing wrong with their cheat and most P2C you find online will eventually be detected. And i only use a soft aimbot without any visuals/fun stuff but if i were to ever go back to that? Yea

iwebz would be my choice once again.

dont cheat anymore but yeah my cheat was never detected and I doubt it will ever be.

still would like a reason why people should get it. i'm getting nothing but retarded replies from nn dogs tryna start drama.

from what I've seen the security is a joke and it gets detected almost all the time. Just a bit more than AW.

So still waiting for a reason.

still doesn't explain why their security is a joke. idk if you're apart of their staff or not but from what I read on their site and off, it gets detected almost every wave. its features are broken and barely work. Also yes, I did read your post it just didn't give me any answers for the important questions.

You asked for a reason to use it, I gave it and I mentioned that it will get detected (JUST LIKE ANY OTHER P2C). You asked for a REASON to BUY THE CHEAT. I gave you one, thats what YOU ASKED FOR. Yet you babble about SECURITY which wasn't the thing you ASKED from ME.

I don't get it, are you even reading your own posts?

Aimware, Aimjunkies, tmcheats and a lot more. Funny how you get offended in a comment where I was saying glws, shows how dumb you are.

I of course do not promote any of the sites above, I found them with a simple Google search but I do have experience with 3 csgo cheats that are not even on this site. So I don't think I need to post 1000 times in a specific section to have credibility for what I am saying.
