Which keylogger is the best on the market at this time for purchase?

Here is my needs :

1. No .net framework need
2. Fully FUD
3. With Binder
4. With Icon Changer

? ? ?

Now that you posted your purpose, let me say this:

Well, it depends. You should just go with what you are comfortable with.

Checkout Orion and Falcon. Thx

AK_Generation - April 27, 2019, 3:06 pm

Checkout Alpha Keylogger ?

Psychedelic. - April 28, 2019, 7:55 am

There's a lot of good ones on the Hackforums market, maybe checkout agent Tesla?

But Orion is not FUD. People should buy crypter to use this keylogger.

Also Orion needs .Net FrameWork.

I want a keylogger in c++ language.

Alpha is new?

Am i right?

How can i trust it?

It is FUD?
What is the programming language?

Agphyso - April 28, 2019, 10:57 am

I personally bought orion and really happy with it

Not FUD honestly, cause it have features that are detected, u need to refud it using crypter, but also it have digital signature that none of HF keyloggers have, Alpha Coder is the coder of 143Vpn Client, member since 2015, U can ask for vouch copy, its coded in VB.NET with a great encryption, it encrypt ur details inside the stub, and hard to decrypt.
