Vanilla Rat v1.5 - Advanced Rat Coded In C#

Full Description:

Vanilla Rat is a remote administration tool coded in C# for Windows. It is stable, simplistic, and designed for ease of use. Vanilla Rat uses the Telepathy TCP networking library, Costura.Fody DLL embedding library, and dnlib module reading and writing library.

Features:

- Remote Desktop Viewer
- File Browser (Including downloading, drag and drop uploading, and file opening)
- Process Manager
- Computer Information
- Hardware Usage Information (CPU usage, disk usage, available ram)
- Message Box Sender
- Text To Speech
- Screen Locker
- Live Keylogger (Also shows current window)
- Website Opener
- Application Permission Raiser (Normal -> Admin)
- Clipboard Text (Copied text)
- Chat (Does not allow for client to close form)
- Audio Recorder (Microphone)
- Process Killer (Task manager, etc.)
- Startup

Update Notes:

To start, I would like to thank all who gave me feedback with the release of v1.4. I have used some of that feedback to build v1.5. Since v1.4, I have only added two features, these features are a screen locker, and text to speech sending. This is far from what I promised on v1.4, some of the features that were requested will be added in v1.6. These features were delayed because I wanted to push this update as soon as I could due to major stability issues. I have reworked the whole entire client, increased performance, cleaned the client code up. The client rework was also able to get the stub down to around 95kb even with the addition of another form with the screen locker. I hope you enjoy v1.5, and I am sorry for not adding some of the features requested! Please remember I value all feedback greatly!

?

Great release and I'm glad that you fixed the stub size. But how can users update their old clients with the new stub?

Nice work! I hope you will continue to develop this RAT as a passion project to the point where it could be sold lol

Vanilla - April 27, 2019, 5:11 pm

Keep coding brother. Nice release.

I mean as of right now I guess you can just upload it using the file browser and run it, but I'll add that in for v1.6, thank you for reminding me.

Like - April 27, 2019, 5:47 pm

nice share there thanks for that

As always, just for you, Vanilla.

Lombaraspine - April 28, 2019, 6:27 pm

Hey man I just tested the rat looks fine as hell :) wanted to ask, is it possible to somehow compile the host in net 2.0 or atleast 3.5?

VelvetCoding - April 28, 2019, 6:41 pm

I believe it must be atleast 3.5 ;)

Lombaraspine - April 28, 2019, 7:07 pm

mhmm im not that good at such stuff, but I think I tried compiling it in 3.5 but didn't quite work, do you maybe have some good tutorial how to do it?

VelvetCoding - April 28, 2019, 8:51 pm

I tried compiling it in 3.5 but didn't quite work, do you maybe have some good tutorial how to do it? That's weird. The RAT was built in the latest version (4.7). Try compiling in that version.

Vagabundo Legendario - April 29, 2019, 10:08 am

nice work , I would pay you for a private one :P

AnonymousOperative16 - April 29, 2019, 10:56 am

Great to see a new release but reverse proxy is required for most of us to make money. Please add it! ?

frank3 - April 29, 2019, 11:07 am

Looks hot, eagerly waiting for 1.6.

s??I?s? - April 29, 2019, 2:07 pm

looks nice,it would have been great,if you had added a file dropper too.

anyways stay HQ.

VelvetCoding - April 29, 2019, 7:16 pm

What do you mean? Like downloading? If you just drag and drop a file in the file browser it will upload.

As I said in update notes, since I wanted to get this update out as fast as possible. Some features including the password recovery were not included. This will be included in v1.6 ;)

? great work sir

NinjahZ - May 9, 2019, 7:28 am

good work bro :D nice release!

Katyuska - May 9, 2019, 1:30 pm

Thanks for sharing this. It seems pretty good already and should be great when you get it finished.

Keep at it and you'll be able to sell it soon. Good luck with this.

VelvetCoding - *May 11, 2019, 2:50 pm*

Pushing v1.6 soon! ?

Alpha_Coder - *May 29, 2019, 8:43 am*

Great buddy, keep it up ?
