This user is claiming to sell loads but his selling updates and not loads. He will update your file from his bot.

Beware, it's not loads. His advertising as loads to claim more cash for shitty updates which cost less than 0.15cent.

Not recommended.

Read the thread you dumb skid:

you want to buy 100 bots(HAHA) and you want me to put your shitty malware on my landing pages or exploit kit ? it wont work, because your shitware does not work under low integrity lvl

thanks for free bump btw. appreciated. ? ?

If you send directly with public stats from exploit kit or directly to files from a landing page, torrents or amazon then it's loads.

When you do updates or installs from a botnet its fucking a update or install you goat fucker.

Get your definitions straight, you are the fucking skid.

Loads - Have not touched sellers bots or have other customers malware installed.

Update - Updates the old malware to new malware and replacing the old malware.

Install - Remove no malware, keep old malware and install new malware.

EDIT:

You talk about my malware but don't know what im using and you are referring to parasite and formbook like these are good bots?

Proof you're just talking nonsense:

I am using smoke bot and i know it beats the bots that you are using.

Before you bump my thread again, please read this part:

pretty sure its too hard for you, so here you go SKID:

You point out something that i qouted you say and made a underline to clarify where you are being a retard.

You cant advertise a update or install as a load so if its about the amount then you lower the price for small amounts instead of false advertising.

I will find another seller who does not false advertise and cheat people.

Thanks for bringing this to the top, appreciated. ?

Please wait 8-12 hours and repeat the process, thanks in advance. ? ?

False advertisement ? Haha, looks like you dont understand english:

Bots comes from falloutEK/RIG or formbook/parasite, depends on order amount.

not sure if you can see this so here you go again SKID:

so in other words:

100 bots for skid like you comes from my loaders, updating my malware with your shitware. no sense with running new flow to skid.

1k+ orders comes from landing pages or exploit kits

False advertisement haha ? ?

You dont write proper english. You fail to understand the definition of what a load is, you cant call it a load and charge the same price that you would for average loads when its not a load.

I have more money than you, I have more expensive malware than you. I will find a different seller who do not lie.

I am not going to spend more time on a liar like you. Call me whatever but im better than you.

Okay fine, haha. Please wait 8 hours and bump again. Thanks SKID

english is not my native language but at least i can understand the basics, haha xD

description is not misleading, everything is clear, but not for MONKEYS ? ?

i can charge 10\$ per bot, thats not your business. You are more experienced, yet you need to use BOTSHOPS, hahaha ? ?

Ok lets start with "C3r34IK1lI3r2" Posts

You clearly see that he's a retarded kid with a dysfunctional brain

Let me point out I've tried his service before, spent well over \$300
And since i noticed that after each order the delivery kept decreasing (Cause it were duplicated installs)

I kept notifying "C3r34IK1lI3r2" about the issue, and all i got is him adding %10 more which doesn't help if you get %50 duplication after your first order ?

Anyways, talked to this dickhead today to buy from him and i was very cautious
Asked him if they were fresh after not using him for 2 weeks cause of previous bad deliveries
And Of course his reply was "ye" "i always have fresh"
I even asked him twice cause i know he's retarded ?

Spoiler [\(Click to View\)](#)

(10:04:18 AM) *****/: do you have fresh bots ?

(10:04:39 AM) C3r34IK1lI3r@a3.pm: ye

(10:04:49 AM) *****/: no really bro are they new ?

(10:05:14 AM) C3r34IK1lI3r@a3.pm: yes

(10:05:18 AM) C3r34IK1lI3r@a3.pm: i always have fresh

But as i said i was cautious about it and gave him another platform to receive clients
To match with previous ones and check for duplication

And guess what happened.....

half of them were from previous orders ?

And it's not even the funny part yet lol

all the clients were filled with Bins/Stubs/Malwares/Miners

Appdata and Startup Registry have tens and tens of malwares installed throughout past months till today

So he's just selling installs over and over again and definitely not fresh.

Spoiler ([Click to View](#))

In Conclusion, DON'T F*CKING BUY FROM HIM ? .

Tried resolving it, even though i already tried before posting

But here's how OP will treat you as a customer

C3r34IK1lI3r2 - May 10, 2019, 2:24 am

So one sales trashing multi(decafeine) is already banned. Its just a matter of time till second one(ancientwolf) end up with closed account too. Ignore this bitch, he is mad because he did not find any amazon and credit cards.

AncientWolf is fucking carding bitch, he admitted to me that he is carding on amazon. I have all logs on my jabber and can screenshare for proofs. Anyone who want his formbook domain and bin, just PM me. His server is not even secured properly.
