Thread: [Your group is not allowed to give Negative Ratings?](#)

Shiiza - April 29, 2019, 4:08 am

I am unable to give negative ratings to any user, although I can give upto +5, does Vendors not have the power to give negative ratings? I can see that UB3R does have the power to give negative ratings however, again since Ub3r have the power to give -3/+3 Ratings, does having Vendor as side group with ub3r will allow me -5 rating?

Effexion - April 29, 2019, 4:08 am

It would surprise me if this was the case. Maybe a small bug.

Deal - April 29, 2019, 4:10 am

You are l33t. I believe only ub3r vendors are allowed to give negatives.

Would make sense since l33t users can't give negatives. Would be logical for a vendor to have the possibility to give negatives. Post it in "suggestions"

Still works for, i just negged you and it worked ?

Yup, that is my doubt, so having Ub3r is necessary to give out negative ratings, Vendor can do +5 without being Ub3r but can't do any negative without ub3r, feels little unfortunate, wish we had atleast -3 access.

You're ub3r + Vendor, I am l33t + Vendor sadly

I think omni might forgot to put Vendor above L33T

Vendor is not necessarily above L33t. It's two completely different usergroups with different purposes.

Agreed, but still doesn't make any sense having +5 access (more than ub3r's +3) but not having any negative rating access. I mean as far as I know to upgrade to both ub3r or vendor needs approval from staff (not sure if ub3r still needs it though)

Marshmallow - April 29, 2019, 4:41 am

Probably a bug.

Leets can neg now so it's probably an oversight with perms. (Unless it was changed)

All these are just theories.

Mr.Magnificent - April 29, 2019, 5:01 am

I can confirm that I can give -1, 0 and +1 rep.

Whoop, sorry I can't... Just tried and it says:

Your group is not allowed to give negative popularity ratings.

Its in the list but i can't give it.

He probably just thinks you can, he hasn't given out rep before.

When you go to neg a member when you're L33t the -1 option is there but you can't use it, people have been complaining about that for years now.

Yeah. It only happened for 1 day that omni forgot remove the ability to neg after a server upgrade.

I think it's just because you're a l33t + vendor. L33t can't give out negative?

Nope. L33ts cannot give out negatives.

Not how it is. Vendor is a group for Marketplace and Popularity is not related. They don't have negative reputation ability. It defaults to their l33t permissions since Vendor is a secondary group.

This is intentional.

I think this input should be added to the [Help Docs](#) too. (To avoid repeated threads such as OPs)

Understandable. Closing thread now. :3
