Thread: [Where do i go from here?](#)

HardStoN - April 29, 2019, 5:57 am

Hi,

i was doing alot of c# projects in console apps and windows forms, i took alot of courses at advanced c# so i pretty much know the topics of the advanced c#.

And in some point it start to get boring (in c#) but i know i didnt covered the whole instresting part of c#.

Did someone know what topic i can learn next (a subject that is interesting).

You're approaching this wrong. You should be learning a programming language to fill a particular task, not just learning it for the sake of it. Otherwise you will get bored.

Think of something in your digital life that you're finding boring/hard to do, and write a program to automate it, for example.
