Spaark's Service Review for "HQ Discord MEMBER BOTTING" by "F A D E".

Before I begin my review, I would like to thank you for giving us Appraisers, the opportunity to review your Service.

I was a bit sceptical about this user to begin with, his low thread count and manner at which he closes his previous services was a bit of a concern. I've been pleasantly surprised however, by his accommodating sales manner. Fade showed me his workload, the way he manages it and what processes he takes to ensure delivery to his customers. He delayed my personal review copy for his clients, whose servers I watched live as they erupted with new members. Fade has been quick to reply even with the debilitation of my Australian Timezone. He answered all of my queries and all round seems a nice guy to deal with. But this review isn't about his personality as much as it is

about the product itself. The delivery is easily observable as the bots flow in, making Fade very accountable to his results. I've also been assured that bots are not sent to more than 15 servers, as a way to mitigate potential closing of accounts. While these precautions are great the real beauty is in the accounts themselves. They blend in effortlessly to the average member list, well generated usernames and profile pictures come free.

I was told about additional features to this service that can really give validity to these bots, they won't just sit dead in your server unless you buy them that way. Fade can remotely alter all the bots to different hold a different status at your request. Whether it be all set to Online, Streaming, Playing, Watching or a mixture of all. He can get that done for you. I was told of a client who purchased 200 bots and had them all set to pornhub.com as a bit of entertainment between friends. The usefulness of this service does come down to what you're looking to get done with it. I'll finish up with my final thoughts.

Final Thoughts

At what I'd consider a pretty cheap pricing range this is a decent enough service. You'll be met with Fade's work ethic and quickly learn the pride he has in what he can offer. The uses of this service are only limited to your imagination, personally, I believe this would be best for a community discord looking to rise in popularity or a sales server seeking to build authenticity through member mass. The bots are of High Quality as stated in the thread, there's no doubt about that. I've not previously seen this service offered on Hackforums and I hope you stick around Fade. The extent of your customisation of these little discord accounts just adds to the upsides of this as stated earlier, quite cheap service. You're prompt in delivery which I can respect, my only concern for your service is the length at which you'll keep it going. You've closed other threads for the reason that you'd only like to do one thing at a time, which is understandable. However I'd like to see that you potentially streamline your workload before giving up on this service. You've got the right attitude to do well here and I hope to see you around months into the future. Overall: this service is what it is. You'll get what you pay for and I'm satisfied enough to recommend it.

Hey there,

It does look legit yes, I ensure they all have different profile pictures and real looking names, they are also all EMAIL verified. It would be safe as I use HQ proxies. Also I'm providing services for discord which would be under SM services I guess.

I bought the 100 online bot service and asked them to be dripfeed a few an hour as it was a new server. I waited 3 days for my order and suddenly I had 50 bots in 5-10 minutes. When I asked this to be stopped I was told to clear my welcome channel and start again but this made my server look 100% fake as 50 people joined and left in 15 minutes. I was offered the bots again dripfeed but lost faith in the OP. I have now been blocked. Luckily I have only paid \$2.50 for the service so not too much out of pocket!

So I ask for a dripfeed service and you did not give me that service. Not sure how I can be scummy as I have not swore or used any type of bad language. I can put the chat log up if you would like to show that I was nothing but polite. I just did not trust your service as you added the bots too quickly and then took them all away. What I have said is pure fact and I have the chat to prove that.

Of course you no longer want to give me the service. You have my money and I have nothing. Who has lost out here?

Hello there,

I would like to know if your service is still available and if is, i would like to make you few questions.

Thank you for your time.
