Thread: [How do I know if my gmail has been compromised?](#)

Dryer_Lint - April 29, 2019, 1:54 pm

If a recipient is not receiving emails sent to them (after physically asking them in-person) when you are 100% sure that you are entering the email address correctly, does this indicate that the emails are going somewhere else, or your account has been hacked/compromised?

Jeepers - April 29, 2019, 1:58 pm

if its all recipients u should then check outbox folder to ensure its not there. then sent folder to ensure its sent.

if ssent goin your setttins and ensure not fowarding features enable alsoshould have a tab to view log in times and ips if im not mistaken.

Where do I go in gmail to check these settings and features?

Jeepers - April 30, 2019, 12:28 pm

top right multi dot. go to account and u will see settings

If you're sending from a gmail account; That'd be impossible for the email just to not arrive at it's destination.

What's more likely the case is either your email is being directed to junk/spam on the recipient's end, or they truly don't care about your email and are deleting it saying they never got it!

The short answer here is change your password and this problem isn't a problem.

A Few Problems - August 4, 2019, 10:12 pm

use avast av they have free gmail leak checks

This reply is wrong.

Go to you gmail settings (gear icon -> "settings") and forwarding tab.
See if there is no other address put to forward messages and delete them afterwards.
Other than that, if you use some other or even your own mailing service, then most likely problem is on that end.

Probley a forward problem OP,
I had this happen to a email that was @fbi.al
it got like shadowed or somthing couldn't send or
receive emails any more.
