Thread: [some illustrations](#)

Motusora - April 29, 2019, 5:19 pm

the guy wanted to make himself a mascot logo with a flag and tower background

another one for client

an illustration of hydra with a router below ?

a chibi style illustration

critiques and comments are welcome

Oh, I love the Torontoguy. They are very professional, not much to add!
Have you thought of starting a YouTube channel with speedarts and stuff?

I really like the way you make the "cartoonish" faces with some more remarks, you should post one with a picture of the face you're recreating next to it, but I understand it if you won't. But I like the extra details most people won't make on them
