Thread: [Free Namecheap domain names! \(I have extra balance\)](#)

debian - April 30, 2019, 11:42 pm

So since I have a little extra credit on my namecheap account and I'd like to start my HF account by giving to the community, I'm willing to give to the first 7 people that reply to this thread (and PM me) a free domain from namecheap (I will use the "Transfer to a namecheap account" option which is instant and free) - as long as the domain you choose is under 2.00\$ USD.

Just reply here then send me a PM with the domain you would like (it must be under 2\$) and your namecheap email address (Create a new account if you don't want to use your main email/details)

Cheers HF! ?
