Thread: [\[Ewhoring\] \\$5000+ In One Week](#)

Cryptod - May 1, 2019, 8:17 am

For anyone who ewhores just wanted to drop some inspiration.

\$5000 in one week - I made more just used Venmo and Zelle and even some on Coinbase.
But here's \$5000.

If anyone actually doesn't know me and wants to call me out I can screenshare the earnings haha.
This isn't really for a bragging right but it's for motivation to people outside of the US and that's currently EWing and doesn't think there is money in the industry.

The key to anything is:

- Be Creative
- Work Hard
- and SCALE SCALE SCALE

People ask if I have morals with this I don't - the reason being is I'm not scamming anyone.
They never find out that I'm fake - they think I'm real so It's all an illusion and they are genuinely happy.

If you guys are scamming with ewhoring:

#1 you won't make big money (because you can't keep milking)

#2 you should honestly just stop... you're killing the industry and honestly getting scammed is shitty.

Proof of Earnings:

Nice earnings I'm planning on starting with ewhoring again today. I guess I'll be the first to ask this on this thread. KIK or Snap?

ApolloDesign - May 1, 2019, 8:41 am

Nice earnings! If you want to make more or are looking for a nice pack to use, send me your telegram in PM

Thanks man!

Snapchat.

Snapchat requires less SE and more just story posting and making sure you're getting traffic. If traffic is hard for you with snapchat and you're good at SE then switch to KIK.

I used to do a lot of kick two years ago

I just started ewhoring again last week after a 2 month break.

The pack is pretty much irrelevant.

I'm using one of the most saturated packs on HF and it works fine.

Thank you btw <3

What do you use for anonymity? Are you able to use TOR -> VPN -> SnapChat?

Do you cash out with your real Venmo, Zelle, Coinbase? (I'm assuming you do)

But how did you make your display name so that it didn't alert that them you are actually "John Doe" Rather than "Sally Susan" or whatever.

Sorry I'm not a big ewhore(er).

I use [censored] with a VPN with a double connection.

I was only really taking AGC and Google Pay but did take some other sources

The only one that doesnt let you change your display name is really Zelle.
I just SE and tell them that they are sending it to my friend and Im going to get the cash from him the following day.

All good <3

I have to agree with you there brother ?

I am not sure the laws in your country, but it is not the most OP sec thing to post this type of information on a public forum. The data will be available for anybody to see for years to come. Especially with advancements in caching services with cloudflare.

I would suggest you to as well not use gyazo ever :D Simply because it is the least OP sec screenshot tool you can use.

I prefer onionshare or ShareX seems pretty good, without having done much research in to it I can not vouch for it's privacy features, although it seems to be good.

Just looking out for you because I seen many ewhore's get caught and some served time ? of course this depends your country, state, etc... But we got to look out for eachother you feel me

BTW nice earnings keep pushing get that bank rolll up then invest it in something that will turn it into even more money! Keep building your bank roll up, investing in new things, and eventually you will have a clean income having started from blackhat funds

That's smart. How many snapchat friends do you have? Do you just use the services/apps that lets you add a lot of friends?

Also do you know how to get on the story page that all the really popular girls end up on?

In that case everything would be a scam - everyone puts up a front lmfao this is just super exaggerated.

No this isn't auto pilot haha

Does venmo and zelle work outside the US though? Usually the only options people outside the US have are to accept Amazon US GC and convert into btc, or paypal, painful painful paypal.

nah they dont...but paypal can be easy to use if you have already have money in the bank and not needing the money instantly. paypal is necessary for me pretty much i lose like 90% of sales sometimes by not having a paypal

AGC

Ive been scammed for hundreds of dollars when trading with AGC human-to-human. I am no longer dealing business with human transactions. I only exchange it through the computer. I used purseio to exchange but that takes weeks to deliver And I lose a lot of money because they exchange with bitcoins.

Is there a way to sell AGC for PayPal or BTC without losing % of money?

Not really many options bud.

I would recommend using a trusted exchanger in the "Currency Exchange" section that can do that for you, always be wary of scammers & use a MM if you feel hesitant. I can assure you exchanging with people on HF will be better than anywhere else, and they can offer the best rates. Just watch out for scammers, it's not hard.

You can go to facebook groups that do amazon reviews and do reviews for free items + your money back through paypal.

Your only option is AGC.

Just think of it like taxes haha.

20%-30% loss isn't bad. ?

I have no clue I'm sure there's a way to do either of those services out of the country obviously not using your CC.

I'm sure there is a workaround you just have to find it out.
