How to insert new user into custom made forum site? Like into this website:xbiz.net

Faith Connors - May 1, 2019, 1:19 pm

Uhhhhhh, just sign up or register?
Or am i missing something

They say it's only for adult industry members, so may verify this. Just add the step "start doing porn" before "sign up" in the instructions. It's also possible they don't verify and you can just lie during registration, although in some countries they do have systems to track who works in such industries and who doesn't so they may check this in which case "start doing porn" would be required. If this is the case it'd probably be easier to get into gay porn, plus it pays more.

Quote:Industry Members Only

Access to XBIZ.net is limited to qualified members of the adult industry.

Even if you find a vulnerability to insert some data in their database, they would likely notice considering they check each user manually.

Faith Connors - May 1, 2019, 5:20 pm

Mb im at work and didnt notice registration was for nazis

literally just upload a video of u jerking off on pornhub and verify your account lmao

yeah but at least we can get users on the database,
do you know how to find vulnerability and insert an old user into database?

I do but what you are asking for is illegal in my country and would require compensation. As well I have morals and only target services / web applications which have good reason to be exploited.

Finding somebody to do this, who is able to, is not an easy task and generally costly. You have about a 90% rate of people attempting to scam for this type of service you are looking for as well, so be careful

Why would you want to put a member into the database? it would probably be noticed.

bcz they dont accept new members

can u tell why it'd noticed?

or what about changing inactive existing members password this would be an alternative way ,isnt it?
