Glws price is a little high try \$500 starting price

Young Sosa - February 8, 2020, 12:36 pm

you should at least list your plugins, screenshots, features, etc....

you can't ask for 750\$ without even saying nothing about it

what does it really offer?

marian089 - April 29, 2020, 5:46 am

I will pay a lot of money to someone who will help me get the sms from Tel. No.

What you meaning Tel. No.? I think You should have to get Android Botnet for GET/REPLY Text Message purpose.

Also be careful while paying a lot of money.

can you explain a little more of what exactly this is please

Stetsed - March 7, 2021, 4:42 am

Explain a little more, You need to give alot of info for smth to expensive. Besides that 1500 to 3 grand? are you insane? What makes it SOOOO good, that it is worth that amount, and what do you mean "Abuse ignored hosting for against AVs companies you can host your bots without suspend for botnet usage." this makes 0 sense. The way you prevent being wiresharked etc is by checking in less often.

Sorry if this sounded harsh, if it is really this good then I take it back. But you have in your post basically only given the info "It has a VNC", and an auto-crypter. Which also doesn't make sense, does it use a shared or a private stub. And so forth.
