Wolf's Vouch Review - Member of Appraisers (Invitation accepted):

=====

(We as members of the Appraisers Team believe in being the first line of defense against LQ products/methods/services and we do our best in going through them to ensure that the HF marketplace has sellers, methods & services which are actually HQ and that the methods/services and the products being sold actually deliver)

Which is why we urge people to wait for vouch reviews before they buy into any method(s) or service(s).

Before I begin my review for this method, I would like to thank you for giving us ("Appraisers"), the opportunity to review your method(s) to ensure it is HQ.

On to the Method/Service:

=====

As said above, people should wait for vouch reviews before they jump into any method(s) or service(s) provided.

Wre©ked has been exceptionally professional and provided top-notch support with the numerous questions I had on what made his so-called 'method' unique compared to all other gambling scripts available on the forum. Gambling is after all gambling and we are bound to lose money in the end anyway if we aren't careful. I'm glad that OP was very prompt in his responses and explained in details all my queries. Most importantly out of all the queries I had - he made it clear that this was not a script he was selling for bustadice or other similar betting sites. This was based on the

probability that he had come up with after hours & hours of testing on his front.

As OP had granted me a vouch copy yet again, I had been working hard & diligently checking in on this for the past few hours on the method provided by Wre©ked.

(Because self-proclaimed words can only carry you so far - we needed to know if this is something that actually works)

My initial thoughts after glancing at the method - Looks Promising but let's test it in action.

Originality: Quite Original in terms of Betting & Gambling (7/10)

Let's start with one of the most important things to any methods/services being provided. How original is the method? Why is it important?

[spoiler]

I have had experience with most of the sub-par 'Martingale' betting scripts being sold on HF as I had bought into those in the past and let's just say - it has never ended well neither for me or for any of the buyers in general. Of course, all sellers will defend themselves in the end by saying it is gambling. Which is true but then again why are you promoting something promising false beliefs that it will make you money - when we are going to lose money in the end anyway. Right? doesn't make any sense. Their most common defense is saying - we are giving you the winning edge to make some quick profit but it never truly works out in longer time periods unless you end up using a high bankroll which contradicts the usual notion - 'Don't bet more than you're willing to lose'

Most people on HF are looking to make consistent long-term earnings via methods or services provided but let me clarify that 'Gambling' is not the way to do that. You can't predict or fool the 'system' - they always end up winning in the end, no matter what the sellers end up saying. I haven't met anyone who got rich just by betting & gambling using a script from here or any other forum as a matter of fact. So, keep that in mind when you are investing in this. But with moderate use and not getting greedy, I can see this particular method working quite well compared to other gambling scripts which are being sold on here. From my experience, 99% of them are practically useless and in my view 'worthless'

But in terms of originality for this method - it's a breath of fresh air that sellers like the OP are trying to bring in something new to the marketplace in terms of 'Gambling & Betting'. The best we can rate this method's originality is around 7. Because after going through multiple known strategies around forums & youtube videos, I was pleased to find in my research that the 'probability method' he is selling is something completely new & unique and not some recycled 'shit'. And just for that, this method deserves the '7' for being original and also because OP is not selling us a recycled 'Martingale based script'.

Content: A few things can be added (or) improved to bolster the Quality (6.5/10)

Next most important thing - Is the content satisfactory?

Spoiler ([Click to View](#))

Well, firstly when you buy into this method - OP will be providing you a (.PDF) which details his

method, the steps with a few accompanying pictures, the probability method and of course a few additional tips which helps in making the earnings more efficient.

Since this particular method is something which boasts itself of being able to generate a 'certain sum' per hour based on your 'capital investment' - I had to make sure that what he claims is actually backed up by hard evidence. Based on my research and testing done for this method, I have had it running for 20+ hours now at this point and with a capital of \$50 which is the recommended amount specified by him, I have generated about \$234 in profits besides my \$50 capital. OP claims, it's possible to do \$5-10/hour - in the end, it depends on the PC that you're using. With lower end PC's & Laptops generating about \$5-6 and higher end Laptops & PC's pulling in \$7-10. By this calculation, your principal is released within 5-10 hours from starting.

At which point, I suggest you pull out your initial investment and keep it running with the House money. I'll further keep this running for a full 24 hours and more to see how long it can keep running without going bust. OP specified, while he was formulating this method - that he had it running for almost a week with 3 million in rotational bets, I have only crossed the 50 Thousand mark at the time of writing this review, so let's see if it can go the distance.

But from my initial 24 hour impression, I am glad to see that I haven't lost money for the first time while trying something which is associated with 'Gambling & Betting'.

Now coming back to the content provided by the OP, there is something I'd have liked to see in the (.PDF) - for instance, having an excel sheet which pre-determines the 'capital' needed based on the 'base bet' you're starting with. It's quite easy and I am sure he can create an Excel sheet for that because having a predetermined value in your (.PDF) is not enough for all people. Some rich people would probably want to try it with \$500-1000 and for them having something where they can try and check it for themselves without disturbing the OP would be beneficial. At one point, it can become troublesome for him and for the buyers as well. So, it's best to give the tools to your customers and only be bothered with other important queries rather than trivial ones like - "Hey, how much can I get with this?" or "How much should I invest, can you check it for me?"

Other than that, it would have been great to explain in your (.PDF) on how the probability method works.

Something like a segment titled, "About the probability method and why it works -" something like that would be a good addition.

Difficulty: Not difficult to Set-up at all (10/10)

How difficult is the thing? Amateur or Pro level?

Spoiler ([Click to View](#))

From my experience, the (.PDF) provided is more than enough to guide you with all the steps. OP had made sure, he posted accompanying pictures so that his steps are not confusing and people don't end up blaming him for someone setting it up wrong. Other than that, from my own personal experience & testing - it basically took me 3-4 minutes to set it all up. So far, I haven't had to touch it - so it is indeed fully autopilot.

[i]I believe you can also rent a VPS and have it run there especially if you don't have a laptop or desktop that you would want to keep it running for 24/7.

I haven't personally tried that but it seems doable from what he explained. The only thing we need

to make sure is that we rent a powerful enough VPS to let it run in its optimum capacity. Other than that, I'd say setting everything is easy and anyone can do it.[/i]

Price: Reasonable Enough (7/10)

Pricing structure - Is it okay?

Spoiler ([Click to View](#))

On the thread, OP is stating that he is currently going to sell only 10 copies of the method. Not sure, if he intends to sell more down the line - I believe he won't but based on his current breakdown. I would say the price is justifiable for two reasons - since it is not a 'Martingale based script' and secondly because you can pull out your capital in 5-10 hours at most. Based on that, I'd say even with the last few copies being \$75 - it'd still be at a fair price point.

Overall: Gambling is Gambling, Use Moderately
(A Wolf in a Sheep's clothing doesn't make it a Sheep) (7.6/10)

My Verdict - Be Responsible as it is still considered 'Gambling'

Spoiler ([Click to View](#))

As highlighted above, I am extremely pleased with what I have seen. This may not be a 'Gambling Script' but don't forget that this is still a 'Gambling method'. Be responsible and use with caution. In terms of everything, I have seen on the forums - I applaud the OP for bringing in something unique. I'd, of course, love to see some minor additions & changes to make the final price tag of \$75 for the last few copies to be even more viable than it already is.

But as I said above, 'Gambling is Gambling' - Be moderate, Control your greed & urges and pull out in advance.

(Don't blame the seller for your mistakes and take responsibility for your own actions especially when you're the one gambling)

(Have a Lovely & Great Day everyone)

This is played on Luckygames.io

It is not a "script" per say. It utilizes the Auto function on the website.

Make money on autopilot, very easily!

NomadicPresence - June 16, 2019, 7:18 pm

Please provide me some information about the method? Does it include a tool? Is this bustabit script?
