Don't know if this correct section, new here so don't mind me if it is just remove it in peace haha.

Anyway I'm looking for sort of a new averaged sized forum just for the community, nothing dodgy don't worry.

So you just want forums where there is a community? Thats it? For what purposes? selling any products?

Sorry for not explaining properly I'm on my phone so I don't even read my sentences I just type hahaha

I'm looking for a forum just related to general discussion niche, would be nice to meet new people etc.

There aren't very many at the moment.

There's a few small boards around that are awaiting Release, and/or a Version 2 update.

Then there's OGU, and OGU copies. There's places like Sythe, but realistically HF has the best community at the moment.

Forums like Sinisterly is still around but they're dead, Leak Forums is Gone, etc.

Not much going on in the forum world these days.
