Thread: [\[WTB\] Undetectable Glow Wallhack](#)

Ar?i - May 2, 2019, 3:10 pm

Had one made by a talented guy on here before and it never got caught by VAC ever. Only problem is that it broke in the panoramic UI update and he has been unreachable ever since. It really was not hard and he did it for \$5 (woulda been free but I insisted lol).

So please let me know if this is possible by any of you guys on here. Reasonable price please.

Undetectable is a strong word. You can buy systemcheats which has a few features and has been undetected since 2013

Unique code + only 1 person using it is pretty much undetectable in my books.

That doesn't make it undetectable, don't use that word. Undetectable cheats don't exist.

Can't be detected if there is no cheat to detect #undetectable

So why only glow? I don't really see a reason why you'd want glow ESP over anything.

That's just what I prefer.

Undetectable doesn't exist.

However fortunately for you I still have your Private Glow project in my repo, drop me a message and I can update this for you again (i don't know how you forgot who made it though)

Actually genius

Ar?i - May 4, 2019, 3:35 pm

Yeah I realise my choice of words was poor. But a non paste cheat with only one guy using it is virtually undetectable to me, tho it is detectable by its nature as a cheat.
