Geo888 - May 3, 2019, 1:42 am

Because the cracked version which you have is unstable .

campusminger - May 3, 2019, 2:11 am

The reason it's dead

The owner has been caught.

It's outdated .

There are people who still use it but it's better if you don't because there are other projects as well as which are updated .

Furiosa - May 3, 2019, 3:32 am

sure it's developed support@fbi.gov , email them and ask a updated version ..how to ask why ? it's outdated and also owner got caught :)

Nosfir - May 3, 2019, 4:11 am

It's fedware and backdoored most of the time. And it never helps that the owner was arrested

Stop....

Also @OP

Aeonhack was arrested for his involvement in the licensing system, not Nanocore directly, but the Netseal license system.

Good product, but destroyed by law enforcement cause of technicalities.

JUSTIN - May 13, 2019, 9:01 am

Mate don't use Orcus RAT...

Armada got caught..

It's being watched by the government/police etc like little Hawks...

Use NJrat or QuasarRAT if you want something free since they both are opensourced.

Hmm are you really stupid or you never used RAT in your life and this post is just for post count ?

Hmmmmmmmm lets think why they are choosing Nanocore hmmm maybe because it have a lot of plugins + features who quasar rat doesn't have and never will because its open sourced and published on Github.

eFriend - May 16, 2019, 7:39 pm

Can u pm me the download link please m8?
