Thread: [Lucky Gift Awards](#)

Omniscient - May 3, 2019, 12:20 pm

I hope to answer any questions about the new Lucky Gift awards you can earn on HF by posting.

They are randomly awarded during a post.

1. You must have 100 posts already.
2. The post must be a minimum of 100 characters.

If your post meets those requirements it's eligible to win one of the three Lucky Gift awards.

Each one offers you a trade-in option with the HF Hack Game. The trade-in feature is being built and should be ready within a few days (probably today). One can be traded in for Game Cash, the other a Skill Bonus, and the last one for a Shop Item.

Once the feature is coded for the trade-in I will have Xerotic post about it with slightly more detail. Basically you'll go to your profile and see the Gift images which will be clickable and take you to a page to open the gift box to obtain your prize.

More incentive to post on HF. ?

Thank you.

Nice man. Good to see more things added! :) Lets goo with winning these. Good luck everybody! Looking forward for more stuff like this!

DOG - May 3, 2019, 12:23 pm

oohh yeah. This so cool, I really need to win to buy a faster battery -_- , I was first in the game and now im falling behind

HF is bringing out updates one after another and we're like on a roller coaster ride enjoying every moment of it.

Thanks Omni for such amazing updates. I joined this forum not a while ago maybe few months and most of my day goes on it.

The new HF Game is quite addictive and looking forward to how it goes from here as you said in your another post it is only 20% complete.

Thornzzz - May 3, 2019, 12:26 pm

So, if I already get let's say a Green Gift and trade it in, am I able to get another Green Gift from posting and keep this one?

CyberPhunk - May 3, 2019, 12:26 pm

While catching up on the game, this would really come in handy!

Thanks for all the efforts and work put by all the team members in bringing the game functionality!

Cheers!!

GnosticPlayers - May 3, 2019, 12:28 pm

I'm really glad that the game is being updated again. I'm a bit miffed that my account got wiped, but I'm sure it was worth it. Anyway, glad to see more shit being added to HackForums nowadays. It used to be really dead, mid way through 2017-2018.

Later <3

I love it, I think this is great encouragement to not only make all of your posts higher quality, but also post more often. I am not going to lie, my post count probably went down over the past 48 hours given the fact I have been playing the game constantly. As well been sitting here trying to do math on figuring out the ranges for each job's reward in attempts to find the best possible option / algorithm to increase my chances of gaining XP/Cash per 5% battery spent.

With the battery upgrades this makes it constant-changing and means I will have to keep track of all data including cooldowns. It may not need to take in to account the cooldown at this time. But I imagine once my recharge rate starts to increase greatly I will need to be including this factor in to my calculations.

Now this encourages me personally to not only write more lengthy posts, as well post more often.

I have to say, these updates and features being added came unexpected to me as I am not creative enough to imagine such things being added. But every time I see one of these new features being added it motivates me to not only post more, also play the game more! It must be cool for you to see the activity behind the scenes, and how much site activity will increase coming from these updates ?

Let's hope I win one soon enough, it will be like opening a present on Christmas :D

Wait so are these still awards that we get on our profile or are they just something we can trade in? Im a little confused with this right now.

Kosmos - May 3, 2019, 12:29 pm

Great idea, to be honest. I'm excited to see if I'll win one of these RNG awards rather than the clovers that I couldn't win lol. I love that it can be beneficial to the hf game.

haha, all jokes aside I have a chart with data being kept of all rewards for all jobs. I am recording the lowest & highest range for each job, as well the cooldown. If you want to contribute to my chart that would be great lol

I have yet to figure out whether the range is randomly generated, perhaps the success rate is used as a factor to determine the ratio for randomly generating the range.

So far I am just in testing & data recording phase, once I have got most the data tracked, I will then attempt to find the best method by doing several tests and comparing my results over periods of time.

Both. You earn the award randomly via posting and the award will be on your profile... but if you so choose you can trade that award in to The Game for game bonuses/rewards. At that point the award will be removed from your profile.

So if you don't play the game you could always keep it on your profile or you can sell it to a game player in HF's original [Award Market](#).

You can earn the award as long as you don't currently have one on your profile. So if you earn the Green Gift and then exchange it in the game then you can post to earn another one since you wouldn't have the award anyway.

Bytes have already been implemented to the game. Now you can turn your bytes to the in game cash. The opposite of it has not been implemented yet.

Updates like these are making me more and more addictive to the game. I hope I don't spend all my day on HF trying to be top on that leaderboard.

It's 100 characters* not words, in reality that is quite a small amount of characters. Considering if you can type at average of 60WPM, with average of 4 letters per word that is going to take you 25 seconds per post.

Also 60WPM is quite slow, I type at over 150WPM so for me it is relatively simple and not time consuming at all to write such lengthy posts.

Almonds - May 3, 2019, 6:42 pm

I'm excited, I like the idea. This concept replaces clovers quite well, another great addition and incentive to post. 100 characters is a nice goal to achieve per post, I think it's fair.

We prefer to test how self-explanatory the game is. Most people seem to have easily found the

Byte to Game Cash page. The award trade-in is obviously less tested as few people have gift boxes.

Right. We are trying to build a very organic game. One in which new players can easily follow and understand without too much instruction. Feedback helps us very much in this endeavor.

Omni says we are maybe 20% done. That means 20% of a SOLID 100% game. But that doesn't mean the game won't be developed until 500% over time. So while we are getting close to having a solid game with a lot to do the game will constantly be developed further with more tasks, objectives, items, and concepts.

Only the gift boxes that grant items should be avoided game trading at this time. The game cash bonus and skills bonus both work fine. We are still deciding which items to grant on this VERY lucky win.

Why would you waste all that time to write a long ass comment when in reality it will just be a shit-post. Have some self respect and please refrain from being so foolish as to even consider something like this. It's funny how you think that you are gaming the system but in fact you are only playing yourself in the end. People who post long as stupid and useless comments are dumb and certainly do not deserve the lucky gift award for their work. I hope you have seen the faults of your ways, as it is pretty obvious. How about this, I'll make a deal with you, not because I care but out of the kindness of my own heart. I wrote this long ass reply as so to create a meaningful yet useless conversation at the same time in pursuit of my own values, although you are able to take part. Cheers to the long rant posts to come, they are quite fun to read. A true flamer indeed, cooked like a damn s'more on a Sunday afternoon at a Dad's getaway camping trip. I feel like Armada would be there somehow, sitting under the trees in a tent on his laptop doing the same thin I'm doing right now on HF. I wish you luck in the reply to this post, the quality is over the top so I doubt you will be able to respond with a more elegant rebuttal.

Glad I could be of assistance, the relevance of my comment is quite irrelevant though. Are any comments really all that relevant? I think that you need to reconsider your overly negative attitude. Maybe my life is somewhat shitty but I don't take it out on others. How shitty must your life be replying with such and aggression at the first sign of criticism? Unfortunately this is all too common in the online world. Have some self respect my friend, I won't bite I promise. No reason to be so negative all the time when you could achieve so much more by simply toning it down a bit. I am quoting your post because I know that you will respond, you can't stand not responding to a post which you believe is "shit".

I had the wrong UID's in the plugin. I was tired and in a rush that day. It's corrected.

I also loosened up the odds for the Green Box which is \$500 Game Cash trade-in value at this time.

You can obtain all 3 boxes. You can trade in a gift box in the hack game and then go post and earn that box again. You can sell these awards in the Awards Market and then earn them again from posting.

I actually really like that idea to be honest, I don't know if you've answered already and don't shoot me if you have, but you can't earn it twice? You have to get rid of it to earn it right? ?

yea pretty sure you have to trade in first if you wanna have a chance at getting another one, makes the value of turning it in higher i guess

This is what happens when members cry and bitch about something you should have left alone. let alone making a thread about it.

<https://hackforums.net/showthread.php?tid=5967367&pid=58546851#pid58546851>

There is obviously a bug and or issue with the new awards.
In fact Omni has already stated this.

You should have just taken the time to relax and have this issue fixed.

Yup, I've used it for bonus cash. Sadly, I couldn't see how much cash I'd get if I used it up. Got around \$500 I believe. Still no use for it as I'm level 2 :(haha

\$500 , lol if its true. I was actually expecting at least \$1000.

I probably will keep the award instead of trading in. Who knows since this can be obtained multiple times. Might probably grind for it while posting.

Yeah they are returning funds that were lost, but not lost time. It may take upwards of 5+ days which sets me back a lot in my investment portfolio. About \$500-750 estimated worth of damage done if it does take the full 5 days or more.

(May 9, 2019 01:28 AM)Lavish Living Wrote: [\[CITE\]](#) Idk purple gift seems to have similar rate to gold clover which only like 20 people got over the span of many many years. But I feel bad for riot, he paid over \$700 for those awards and is selling them for like \$100 lol

And lol bitcoin is rising you aren't losing any money noob you're making money! So true, it would be cool if your purple gifts got some sort of change to them so they are noticeably different from the lucky gift award. Like maybe glowing or some other special effect to make them stand out

Yeah I was going to buy for not much more than that \$100 ? But I ended up not buying cause I don't want to be filled with random coins lol, they take forever to sell also

True, somebody told me that when I woke up all pissed off from the data breach, I went and looked at openmarketcap and realized I made some nice profits so I am happy :D

Ooh I do like the boxes . Giving them intrinsic value by the trade-in system is pretty neat.

Tbh i doubt i will ever get it, but love to see new awards. :D

Am i the only one that feels like leveling up has gotten really slower though?

Every level requires more XP than the last.

I usually get a insta tick but when i do anything on my VPS i have to do them all the fucking time, and it makes you pick twice so it confirms even though you got it right the first time.

Yes recaptcha is one of the worst captcha services because they are extremely disrespectful especially to users who are not using their DNS servers.

Im High - May 9, 2019, 2:40 pm

Yeah I hate having to guess what kind of XP I need until the next level.

Makes it a bit harder to make rational decisions about game progress as far as job picking goes.

Lucky for me, I love taking chances.

That might be why I'm so low level though. ?

Traum - May 16, 2019, 9:26 am

Damn, my luck is apparently super bad. Haven't got the dice award, haven't got a clover, haven't got any of the presents yet although I'm always making sure to go past the 100 characters.

Lmao That meme tho ?

I also didn't know when I got traffic lights captcha, if I had to select the poles aswell or only the actual traffic lights.

No, they don't. Lucky Gift boxes are they only awards you can get randomly through posting. Only way to get a clover is to buy one!

Thank you Omniscient for the HF! I have been here for a few months and love the forum! I have never been active in any forum before! but here I'm going all in and try my best to support and help anyone I can!

Waiting for my first Award! :)

Yes you will loose it if you open with game. You have to wait 6months before you can sell an award and must be upgraded.

I noticed that the Purple Gift award is very rare as only two members have been lucky enough to earn it from posting.

Green is definitely the highest chance. Though purple is my favorite color so that's the one I will be going for until I get it!
