PusherClear - May 4, 2019, 1:18 pm

This is a new crypter, with no TOS. ?

Some proof and videos

[Video: <https://www.youtube.com/watch?v=I8ZLMSdVQhM>]

If you wanna buy, contact me on discord Pusher#0464

Takehito Morokuzu - May 4, 2019, 2:42 pm

Hey, just so you know, Discord is not allowed on this forum, and this needs to be posted in the Cryptography Marketplace. You'll get banned for posting your discord. :) GLWS anyway

Twistd - May 4, 2019, 3:52 pm

Why would you add all those different encryptions? You know it doesn't matter, right? You're also stating that it's fud runtime but showing one video of just one antivirus?

Not to mention the gui..... Just ehmm....

Updating stub every two weeks? Have you EVER even maintained or made a crypter before? And ehhhh... what's up with showing cpu useage and date + time? This is getting pretty silly.

I'm speechless.
