Thread: [HQ method: Make 130% profit constantly by my safe gambling method](#)

I am selling my gambling strategy that could give you ~130% return on your investment 24/7. You can make 2-3 times of your investment in a day.

I only sell this method to a limited number of people to maintain the quality. I ask for 0.02 BTC.

This is a gambling method so there are some risks involved. Based on my calculations, you can adjust the risk between 0.0001 - 0.000001% and still have ~130% return.

How is gambling ever safe ? Lol

Seems legit, gambling is only safe if you find an exploit in the site....which would be stupid to sell.
