Thread: [Free Hand Pencil / Inspired By Motusora](#)

Life - May 5, 2019, 12:34 am

First free hand drawing with the Apple Pencil. Let me know what you think! Traced the general shape just to get a good idea as I am not a drawer I'm just starting to learn! But after the basic shape I adjusted it.

Really want to get better at drawing etc making logos etc.

Looking good! You got a real unique style to drawing, and I think you will truly expand in to being a professional designer one day if you keep working at it!

I generally do not like Apple products, but you liking the Apple Pencil a lot? Have you used any other's to compare to or is this your first one used for graphics designing? ?

Keep up the good work my friend.

Wow that means a lot! Thanks for the comment! Honestly first attempt at anything like this so I really appreciate it!

This is my first time ever using a digital pencil and tablet. And I love it. The responsiveness is insane.. it literally feels like slippery paper... (I've always occasionally had the urge to sketch random things but honestly not the biggest artist.

So I give the Apple Pencil 5 stars. With the latest and best iPad Pro. Designed in Procreate.

Thank you Sir! Really motivated me! ?

Deal - May 6, 2019, 2:53 am

What the fuck have you done to the eyes of that hideous creature?

Nah but it actually looks alright as a whole, but it's just.. These eyes man you have got to do something about those.

I have never heard of an apple pencil, but it sounds pretty cool. Have never heard of procreate, but have you ever been using Adobe Illustrator? It's great software, and you can get the Adobe CC full pack for like \$25 a month if you are a student.

TL;DR: Fuck off with those eyes, but rest is good.

Hahah thanks Deal! Yeah I know they aren't that great. Eyes have always been my weak point. So something I really need to improve on.

Well I only have the iPad at the moment. I don't think it supports the full Adobe CC Collection yet. But I will have a look. Still in the process of saving for a good pc. Or any for that matter. But thanks for the tip!

Bacardi Cola Lime - May 6, 2019, 3:47 am

You're on your way to make a great piece of GFX art. Check some tutorials on shadowing, so you can bring life into the piece. Once you've covered that, you can fix the presentation by probably adding a dark background and some white on top to imitate light. Ready to go! Nice piece overall, keep working on it!

I'll get right on that! Heaps of advice! 2 things to do now so I'll redo the piece and see how much it

improves!

Thank you for taking the time to comment and appreciate it very me! ?

Nimmy - May 8, 2019, 1:48 pm

This looks really good but the eye looks a little messy and the colors should pop out more.

Yeah I've changed the eyes since haha got rid of that weird looking line. Also trying to make it look like the head is coming out of a shadow sort of. Bit of a challenge but I'm working at it.

Thanks for your response!

Mix - May 11, 2019, 9:21 pm

Really nice fore a little design add maybe some shading and effects to it and I think you will have a nice little logo design there.

Thanks Mix! Yeah just trying a few things when I've got time just fiddling around with Procreate. I'll release the finished or updated version when it's done
