Adventures & Travels

I have always been fond of going on hikes, on bike trips, camping, or just driving down new roads. Last week I started an adventure that I will never forget. I am currently in Spain walking the Camino De Santiago.

For those of you who have not heard of it before, it is a trail that flows from St Jean Pied de Port in France to Santiago in Spain. It is a 800km (~500 mile) trail and I will be hiking it from start to finish. I am currently in my 6th day on the trail and I have 36 more days to go.

Here are some pictures!

What are some memorable adventures or places you have been to, or what are some things you would like to do in the future?

Celibate - May 5, 2019, 7:05 am

What's up bowman? France looks absolutely gorgeous! I was fortunate enough to be able to visit where my ancestors lived in the Northern Alps in Italy.

If I could retire and live anywhere, this is where I'd wanna die at. People are incredibly nice and the food is to die for!

That's some amazing fucking views man. Here's a picture I took from my home town, little blurry.

Recently visited the big apple, was very fun.

I hope to visit some of eastern Europe in the near future like Belarus, Ukraine or Moldova etc. No doubt in my mind there's interesting history to explore there, especially in the more rural areas.

Wow those are some great picture Bowman. I've always wanted to get myself to a tropical area. I'm a big swimmer and I just want to take a vacation where I can snorkel in some crystal clear water.

Mix - May 5, 2019, 9:32 am

Really nice picture I want to add some pictures of the blue caves that I went to in Greece a few years back but sadly The hard drive I had them all on failed and sadly I dont wanna get it restored.

BTC - May 5, 2019, 10:10 am

God damn those pictures are so surreal it seems as though a professional photographer took these!

Is that something you enjoy doing and have been practicing a long time? You have a natural skill to taking pictures and finding the right shots / places to take them.

The most memorable place I have been to is Nepal, China. It is truly beautiful and seeing their way of life in the smaller villages, meeting all the communities is amazing to me.

?BowmanBot? - May 5, 2019, 1:41 pm

This is going to be one long post :D

I've driven through New York State but have never actually gone into the city. Looks amazing though! However, I'm more of a country man myself.

So I'm doing the Camino de Santiago which is 800km but there is a trail that goes from Budapest, Hungary all the way to the southern coast of Portugal. It is 4000km long and would take me 4 months to complete. Don't know when I'll do it but I would love to in the future.

Most people don't venture outside of Madrid, Barcelona, or Pamplona unless they are doing the Camino. Thank you by the way!!!

I'm in the Northern part of Spain which isn't that tropical, when I wake up tomorrow it'll only be

around 2° C (39°F). I would recommend Australia or Iceland for snorkeling and diving though. Amazingly clear waters and some really interesting sights.

I don't physically backup any of my photos anymore. Google gives me unlimited photo and video storage that are taken from a specific cameras that I use as per a contract I have with them. Greece is a beautiful country but it isn't doing too well right now

You will very rarely come across a photographer who doesn't enhance their shots in some way. But if you are asking if I photoshopped or colorized them, the answer is no.

Wow, you're certainly living the life lol. Hiking the 500 mile trail while still having time to go on hf. Hopefully your legs don't hurt too much.

Not too much time, between socializing with locals and other pilgrims, hiking, sleeping, and eating, I don't really have much time to do anything else. :D

I've been training for this trip for months, the third and fourth day my legs were kind of stiff but now I perfectly fine.

Nimmy - May 8, 2019, 1:39 pm

These pictures are amazing! I've been to many places to count. Some of my favorites have been Italy, Bahamas, Cozumel, Alaska and Utah.

^-^

Yes they are what are commonly referred to as chemtrails but that is water caused from the evaporation of the any built up condensation around the engines as well as any H2O that is found in the fuel.

It's a common misconception and it is unbelievable that people still think that it is a government conspiracy.

Yes yes yes, I know that we live in a virtual simulation. Everything is digitally created.

Thank you sir! I'm back in Canada at 11th. So three more weeks of the six.
