"Some blog says its dangerous" hell doesnt common sense tell you it's dangerous when consumed ,
its used as paint thinner and solvent.

Detoxes are big fucking scam anyway, you have liver, kidneys and lungs that detox your body.

OMG You are talking about the commen sense, turpentine comes in two different forms , one is
used only for thinner and stuff and other turpentine gum spirit IDk I bought the ayurvedic one which
is used for body pain etc.

I was looking for an answer who knows stuff.

If you wanna detox, just starve and go on a fast with water.

Think about it, it eventually turns you into skeleton.

I wouldn't use it tbh just a quick google search of turpentine toxicity brought me here.

Turpentine is toxic regardless of how people wanna put it. You think a gum which is man made btw would change that? What about motor oil gum? safe or what?

Tip: Fast when its warm weather, much nicer. Can go on walks and be more active overall.

Detoxes are big fucking scam anyway, you have liver, kidneys and lungs that detox your body. Stated perfectly.

You have organs that detox your body at all times so this huge-fucking-idiot advertising to ingest anything stupid, like turpentine, is going to get you very, very sick or just die. Like, you're a corpse in an hour "die". Do NOT listen to this moron on YouTube. Block the channel and play outside.
