Parasite HTTP Remote Administration Tool

What is Parasite HTTP?

Parasite HTTP is a professionally coded modular remote administration tool for windows written in C that has no dependencies except the OS itself.

With the stub size of ~50KB and plugin support it presents perfect solution for controlling large amount of computers from a remote location. You can read more about it here :

<https://threatpost.com/highly-sophisticated-parasite-rat-emerges-on-the-dark-web/134478/>

Screenshots

Spoiler ([Click to View](#))

FeaturesNo dependencies (Coded in C)

Small stub size (~50KB uncompressed, ~25KB compressed)

Dynamic API calls (No IAT)

Encrypted strings

Bypass Ring3 hooks

Secure C&C panel written in PHP

Firewall bypass

Supports both x86 and x64 Windows OS (from XP to 10)

Full unicode support

Online builder tied to your domain/s (Build bot bin anytime with any settings you wish)

Encrypted communication with C&C panel (Optional - SSL using self signed certificate)

Plugin system

Multiple backup domains

System wide persistence (x86 processes only) (Optional)

Injection to whitelisted system process (Optional)

Install & Melt (Optional)

Hidden startup (Optional)

Anti-Emulation (Optional)

Anti-Debug

Extended statistics and informations in the panel

Advanced task management system

On Connect task (New clients will execute task/s)

Low resource usage

Special login page security code

Captcha on login page to prevent brute force attacks

Download & Execute (Supports both HTTP and HTTPS links)

Update

Uninstall

Available PluginsUser management

Browser password recovery

FTP password recovery

IM password recovery

Email password recovery

Windows license keys recovery

Hidden VNC

Reverse Socks5 proxy

System ReqPHP 5.6 or greater (Gd & OpenSSL)

IonCube Loader

SQL Database

Price & Purchase

The price is 500\$ (include all plugins)

Rebuild price is 50\$

Payment options: BTC or XMR only

Note

For all informations about the project or support you can submit a ticket on site. I'd rather avoid using HF PM system so sometimes I won't be responding to certain PMs.

As for crypters, do not ask me what to use. I honestly don't care what you use, what is the best, what doesn't work so don't bother me with those kind of questions. Same goes for hosting, I will not recommend nor suggest anything.

You can NOT pay with PayPal, PaySafe Card etc... Only BTC is accepted.

I am not going to set up the panel for you, in fact I am not going to touch your server. If you are unable to set it up yourself then don't buy it. Alternatively, you can pay someone to set it up for you but that is not my concern because its rather trivial to set it up.

If you share your account, or lose access to it and contact me about it, I will suspend your account. Your account is your concern, use complex password and don't share it with other people.

encrypted_true - May 6, 2019, 2:23 pm

looks good, hvnc works fully? like with newest chrome etc

BTC - May 6, 2019, 2:25 pm

I know you posted a while ago about adding updates in the future, and working on it actively. I am curious if any of those updates have came out since the last version? If so could you please share with me what features have been added or you plan to add in future?

I am extremely interested, and good job on continuing supporting the product. Far too many sellers of similar products will disappear months after releasing.

brianfs - May 8, 2019, 6:39 am

May I know if your product is sniff the logins (like formgrabber)? Because many people don't save the password anymore...

Nosfir - May 8, 2019, 7:08 am

(May 8, 2019 06:39 AM)brianfs Wrote: [\[CITE\]](#) May I know if your product is sniff the logins (like formgrabber)? Because many people don't save the password anymore...

Nope, and it doesn't even grab cookies so the pass grabber is almost useless

C3r34IK1lI3r2 - May 8, 2019, 11:42 am

(May 6, 2019 02:23 PM)encrypted_true Wrote: [\[CITE\]](#) looks good, hvnc works fully? like with newest chrome etc

I did not test it with latest chrome but i think it works.

Parasite is running for over a year now, i think its long-term project.

(May 8, 2019 06:39 AM)brianfs Wrote: [\[CITE\]](#) May I know if your product is sniff the logins (like formgrabber)? Because many people don't save the password anymore...

There is no formgrabber atm, but parasite posted once that he is working on it.

(May 8, 2019 07:08 AM)Nosfir Wrote: [\[CITE\]](#) Nope, and it doesn't even grab cookies so the pass grabber is almost uselessCant agree with you, its doing the job just fine.

formgrabber? Which browsers did he say? And which protocols will it support lol. Will he let me look at a build so I know what im buying is not junk, before buying or no? ?

Nosfir - May 8, 2019, 2:25 pm

(May 8, 2019 11:42 AM)C3r34IK1lI3r2 Wrote: [\[CITE\]](#) Cant agree with you, its doing the job just fine.

Yeah it's an amazing grabber, it's just that it can be useless emphasis on can

yea for sure you will get a free build lol. you can read old sales thread and researchers reports(one of them is literally at the top of this thread lol)

(May 8, 2019 02:25 PM)Nosfir Wrote: [\[CITE\]](#) Yeah it's an amazing grabber, it's just that it can be useless emphasis on can

it recovers popular browsers, ftp & im clients. you can always add your own grabbers.

Nosfir - May 8, 2019, 2:42 pm

Yeah that's true! Very good point, once again I'm just talking about the cookie grabbing features and such aren't existing, so for some things it's not the best, but honestly this is the best BOTNET on the market (meaning not loader/stealer)

I have no plans to disappear. Lately I have been caught with other stuff so I had to pause the development but now I am back on it and will release update soon. Just have to test some stuff more.

Nosfir - May 9, 2019, 5:32 am

(May 8, 2019 02:55 PM)MaximumPain Wrote: [\[CITE\]](#) nah seriously, i dont care what researchers say i rather look for myself ?

xfelix05 - May 9, 2019, 12:39 pm

Hello, can this tool recover Outlook, Foxmail and Thunderbird Password?

Anesthesia_Love - May 10, 2019, 11:07 pm

does it have support to have the domain using tor? or bots to connect to tor?

LordDragon - May 10, 2019, 11:36 pm

I thought it was \$250 in your old thread?

panan - May 11, 2019, 11:27 am

I saw that didn't crawl the cookie. Does your new version have this feature?

__M__ - May 12, 2019, 9:30 am

is this version stable? when your updated version will release, any ETA?

P4r4517 - May 13, 2019, 3:24 am

(May 11, 2019 11:27 AM)panan Wrote: [\[CITE\]](#) I saw that didn't crawl the cookie. Does your new version have this feature?

No, the plugin only recover saved passwords.

(May 12, 2019 09:30 AM)__M__ Wrote: [\[CITE\]](#) is this version stable? when your updated version will release, any ETA?

Its stable. I dont have exact date but It will be soon.

trippye - May 13, 2019, 7:32 am

Can this run shell commands? Can you run executables through the RAT on the infected computer? Also, do you have any vouches, aside from said article?

P4r4517 - May 13, 2019, 2:57 pm

(May 13, 2019 07:32 AM)bowman Wrote: [\[CITE\]](#) Can this run shell commands? Can you run executables through the RAT on the infected computer?

Also, do you have any vouches, aside from said article?

It can not run shell command. You can download and execute other executables through the rat.

There is an old thread in this forum, just look it up.

Dragonvixs - May 27, 2019, 1:17 am

I got parasite HTTP setup on my server. but when i click on my rdp. I go get the password saved in the rdp and system browser.

Any Idea Why

Submit a ticket with more details on my site and I will help you.

Psychedelic. - May 31, 2019, 2:10 pm

I have started a contract with you and I am ready to purchase this as soon as you are online. I won't need any further assistance after I get the license, I know what I am doing with these. Already have domain/hosting. Thanks!

P4r4517 - June 1, 2019, 4:18 am

Please go to <http://parasithenxhddj.onion> and make a new order, then initiate new contract with me.

Zweisicht - June 2, 2019, 1:41 pm

Which crypter best work with Parasite http ?

softer2 - June 25, 2019, 3:42 am

last update?

the botnet is spread?

SIM-3432714 - June 25, 2019, 3:15 pm

(Jun 2, 2019 01:41 PM)slyopez Wrote: [\[CITE\]](#) Which crypter best work with Parasite http ?

It works with any crypter. I recommend native crypter which does not require any vc runtime.

c3ntralcommitment - July 12, 2019, 9:22 am

Website don't work :(

And are there any statements about that parasite got leaked by crackers?

nCuX0 - July 15, 2019, 2:32 am

Hello, i want to buy rebuild, but your server is offline since few days. Get back to me as soon as possible please. Thanks in advance.

amnesia02 - August 1, 2019, 6:54 am

Hey guys any news? Is it working now?
