Thread: [Profitable Things to do with a High-End VPS](#)

Pork - May 6, 2019, 8:11 pm

8 Intel Processors/CPU's & 30GB of RAM.

Looking to see if anyone knows of ways to make money with a VPS this powerful,
May partner with someone intelligent enough, so lmk
And just so you guys know it's a Google Cloud VPS (Debian OS).

Happeh - May 6, 2019, 11:56 pm

Ping the PSN network until it goes down and a fat guy will give you \$50k in vouchers to stop so he can play his GTA.

Sell it to someone else, mining crypto will not get anything for you.

Omniscient - May 7, 2019, 1:22 pm

Start a cheap hosting company, get some clients and run a control panel.

Install cPanel, install CloudLinux and CageFS.

There's your server. Capable of holding plenty of clients. Just standard shared hosting yes but it will still yield an income if you have any kind of marketing skills.

No, just sell budget hosting. It should yield some form of revenue, probably not much though.
